Schaff, Angelo John Cifaldi, Brian E. Curtis, Anne Davis, Lauren Shaiova, New Jersey Institute for Continuing Legal Education, 2010 *Marijuana 360* Nancy E. Marion, Joshua B. Hill, 2019-05-08 In 1996 California became the first state to legalize medical marijuana Since then 30 states and the District of Columbia have passed laws legalizing marijuana in some form Nine of those states including Alaska Oregon Colorado and Washington have legalized marijuana for recreational use Many states including Arizona and Ohio are considering legislation to allow for legalized cannabis use Marijuana 360 Differing Perspectives on Legalization examines the perception of marijuana legalization from the perspective of those who are directly involved in some aspect of legal marijuana Nancy E Marion and Joshua B Hill interweaves the interviews from a variety of representatives from different integral groups that have been affected by marijuana legalization in both states that have legalized or are considering the legalization of marijuana to get their impressions of the impact the law has made or will make in their area These groups include medical professionals educators parents lawmakers drug users and others There is more public support for reform than ever before but still much debate over the issues of legalizing marijuana Marijuana 360 increases our understanding of what different professionals think about the legalization of marijuana Marijuana legalization. Positive and negative effects of marijuana for medical purposes Difrine Madara, 2020-05-25 Academic Paper from the year 2019 in the subject Medicine Pharmacology Pharmacy grade A language English abstract Several jurisdictions around the world have passed laws legalizing the use of marijuana for medicinal purposes These legislations allow for the use of cannabinoids and cannabis to alleviate some of the symptoms associated with terminal cancer epilepsy and neurological illnesses However there are serious public health concerns associated with marijuana as some experts argued that these jurisdictions have not effectively regulated its use in a manner consistent with the international drug control treaties In many cases Subbaraman 2014 indicated that marijuana is being diverted for use in non medicinal purposes In most of these countries poor regulation of medical cannabis programs is attributed to the low perception of risk among the policymakers and the members of the public as a whole In the United Kingdom and several countries in Europe marijuana is either totally banned or its use is heavily regulated As a result there have been increasing calls for the UK and the rest of Europe to follow the footsteps of Canada the Netherlands and a growing number of states in the United States where the use of marijuana for medicinal purposes has been legal for quite some time In this regard this essay evaluates whether the UK and the rest of Europe should legalize marijuana for medicinal purposes This paper explored some of the positive and negative effects of

marijuana on the people and the rest of the economy

The Debate between legalizing Marijuana and its Benefits for Medical Purposes. Medical Use of Marijuana Tatiana Shohov, 2003 In recent years there has been much debate over whether marijuana an illegal drug can provide patients with a level of therapeutic relief comparable to existing pharmaceutical treatments While this idea is hardly new it is advanced by some proponents as deserving more scientific inquiry Advocates for the medical use of marijuana contend that there is already sufficient scientific evidence to justify rescheduling marijuana under the Controlled Substances Act a change that would give it the necessary legal recognition to be used for medicinal purposes This has already occurred in the case of dronabinol the synthetic form of the main psychoactive ingredient in marijuana which has been available as an oral prescription drug since 1986 under its brand name Marinol To address these viewpoints several comprehensive studies were done in the late 1990s to evaluate medicinal claims made for smoked marijuana and determine whether they are supported by convincing scientific evidence The medical marijuana debate gained attention at the state level in 1996 when voters in California and Arizona approved ballot initiatives allowing doctors to prescribe the drug for therapeutic uses In 1998 similar propositions were adopted in Alaska Nevada Oregon and Washington and reaffirmed in Arizona Voters in Maine adopted a medical marijuana initiative in 1999 In 2000 medical marijuana was approved by voters in Colorado reconfirmed in Nevada and passed by the legislature in Hawaii Federal health officials assert that these initiatives are part of a strategy to soften the nation's drug laws and that public policy would be better served if science rather than the ballot box were used to judge the drug's utility This book assesses the current issues and examines the controversies regarding the marijuana legalization issue *Considering Marijuana Legalization* Jonathan P.
