Trahair, 2013-10-31 Utopian ventures are worth close attention to help us understand why some succeed and others fail for they offer hope for an improved life on earth Utopias and Utopians is a comprehensive guide to utopian communities and their founders Some works look at literary utopias or political utopias etc and others examine the utopias of only one country this work examines utopias from antiquity to the present and surveys utopian efforts around the world Of more than 600 alphabetically arranged entries roughly half are descriptions of utopian ventures the other half are biographies of those who were involved Entries are followed by a list of sources and a general bibliography concludes the volume Cultures of Peace Elise Boulding, 2000-05-01 Renowned sociologist Elise Boulding offers an eminent collection of essays that emphasizes her

study of civil society over the past fifty years While most media and academic attention focuses on the extreme violence in today's society Elise Boulding notes an equally significant presence of cultures and societies of peace Here in a volume that represents a life's work she revisits her theme of the connection among family community and government and offers enriching perspectives and advice on how to fuel the process of peace Boulding examines structural violence in terms of the major institutional obstacles to a more peaceful future the tension between the states and the people trapped inside them the tension between the technosphere and the biosphere and between global systems and local know how She describes social movements around the world that are developing alternative ways of handling the great diversity of human biospheric needs on the planet In addition Boulding brings together her experiences to empower the peace building activities if we are to do better in the twenty first century than we have done in the twentieth century Provided by publisher **Utopias** Howard P. Segal, 2012-05-21 This brief history connects the past and present of utopian thought from the first utopias in ancient Greece right up to present day visions of cyberspace communities and paradise Explores the purpose of utopias what they reveal about the societies who conceive them and how utopias have changed over the centuries Unique in including both non Western and Western visions of utopia Explores the many forms utopias have taken prophecies and oratory writings political movements world's fairs physical communities and also discusses high tech and cyberspace visions for the first time The first book to analyze the implicitly utopian dimensions of reform crusades like Technocracy of the 1930s and Modernization Theory of the 1950s and the laptop classroom initiatives of recent years *The Philosophy of Utopia* Barbara Goodwin, 2012-12-06 This collection addresses the important function of utopianism in social and political philosophy and includes debate on what its future role will be in a period dominated by dystopian nightmare scenarios *Alchemists of Human Nature* Petteri Pietikainen, 2015-10-06 A study of Modernist utopias of the mind This book examines the psychodynamic writings of Otto Gross C G Jung Wilhelm Reich and Erich Fromm It argues utopianism became increasingly important to the fundamental ambitions of all four thinkers and places the utopian impulse with the historical context of the early twentieth century **Post-Apocalyptic Cultures** Julia Urabayen, Jorge León Casero, 2024-03-19 This book advocates for the necessity of recovering the value of utopias as political projects that open new channels of action The criticism of modern political utopias is based on the supposed impossibility of creating for the future because there is no longer a future apocalyptic ideology However this edited collection seeks to show that the post apocalyptic world in which we live entails a renewed freedom of design for the radical reorganization of institutions Post apocalyptic cultures are not obligated to follow the capitalist anthropocentric correlationist and sovereign modes of the old political project of emancipation the Western enlightenment that has started to collapse With this in mind this book is divided into four sections dedicated to the main themes from which to rethink the projects of political emancipation that are possible nowadays technopolitics posthumanist biopolitics non western politics and the crossover between arts and politics
