drastically and to proliferate more rapidly As a matter of fact that is the time when things went wrong because a process was started off which was to continue with ever increasing speed and on an ever increasing scale The present condition of nature as a result of the activities of mankind is generally known Whether it is an accident with a nuclear plant or the vanishing of tropical rain forests acid deposition or the pollution of soil water and air environmental disasters almost seem to be the order of the day It is striking that with all these more or less arbitrary examples the provision of energy plays a role In this respect one can add an even more important energy carrier to the list namely crude oil *Topics in Radar Signal Processing*

Graham Weinberg, 2018-05-16 Radar has been an important topic since its introduction in a military context during World War II Due to advances in technology it has been necessary to refine the algorithms employed within the signal processing architecture Hence this book provides a series of chapters examining some topics in modern radar signal processing These include synthetic aperture radar multiple input multiple output radar as well as a series of chapters examining other key
