Cross-Border Challenges in Informatics with a Focus on Disease Surveillance and Utilising Big Data

Achieving and maintaining cross-border interoperability of electronic health records systems implies managing the continuous process of change and adaptation of a multitude of elements within and across electronic infrastructures in neighboring countries. _x000D_ This book presents the proceedings of the 11th Special Topics Conference (STC) of the European Federation for Medical Informatics (EFMI), held in Budapest, Hungary in April 2014. The EFMI STC is an important international forum which brings together computer and information sciences, medicine and technology to present results of current scientific work in health informatics processes, systems and technologies. The theme of EFMI STC 2014 is "Cross-border challenges in Informatics with a focus on disease surveillance and utilising big data".

An Electronic Patient Referral Application: A Case Study from Zambia

Electronic medical records (EMRs) benefit health systems, especially in low-income developing countries. EMR systems can give medical personnel access to patients' records and can reduce time needed for data management and record keeping. The report discusses the design, implementation, and results of an installed electronic perinatal patient-referral system supporting health personnel who referred patients through a
