Towards a Contextualized Conceptualization of Social Justice for Post-Apartheid Namibia Basilius M. Kasera, 2024-05-31 The search for justice beyond the basic political understanding is profoundly theological and ethical In this work Dr Basilius M Kasera analyses the meaning of justice in post apartheid Namibia from a biblical perspective He argues that notions of justice carry no meaning unless they emanate from the community of the affected Every group of people by virtue of being God's image bearers are able to assess their own context and provide befitting solutions However this kind of agency has not been afforded to the post apartheid Namibian society which continues to operate on borrowed models of justice While extrapolating on Allan Boesak's beneficial theological concepts of justice Dr Kasera encourages theologians and Christians at large to participate in the creation of meaningful effective and transformative policies programmes practices systems and justice institutions

The Pitfalls of Virtue Ethics Husain Sarkar, 2025-09-18 In this book Husain Sarkar offers a remarkable look into the groundwork of virtue ethics Especially focusing on theories proposed by Julia Annas and Rosalind Hursthouse he examines a multiplicity of cardinal tenets of virtue ethics by bringing five cardinal

objections namely the self defeating objection the circularity objection the moral relativism objection the explanatory poverty objection and the inconsistent advice objection to bear upon them These objections define the shape scope and substance of the book Collectively they unveil several fault lines a few hitherto unsuspected Sarkar argues that notwithstanding the novel intriguing answers to old familiar ethical questions the answers are so fraught with difficulties that virtue ethics as a philosophical moral tradition is best seen as badly in need of repair and reformation Perhaps this book may provoke a Renaissance in the field of virtue ethics

global challenges that are directly linked to our economic activity They affect our very existence and jeopardize our ability to lead a good life today and in the future both as a society and as individuals The range of questions for which we need answers seems limitless and finding the right path for global change increasingly utopian How do we maintain an overview in the face of highly complex interrelationships and interactions How can we distinguish the essential from the non essential What fundamental relationships in nature do we need to take into account What kind of economy is appropriate What is just And under what conditions are people willing to change This book offers orientation It deals with concepts from the natural sciences economics and philosophy including time thermodynamics scarcity responsibility and justice which enable an understanding of the upcoming transformation to sustainability from different perspectives Ideally they serve as guidelines for effective decisions and show how change is possible despite immense challenges The book is aimed at anyone who wants to contribute to the transformation towards sustainability whether in politics business administration or civil society

Justice to Future Generations and the Environment Hendrik Philip Visser 't Hooft, 1999-06-30 This book contributes to the discussion about obligations to future generations by arguing that a principle of justice according to which we must share the environmental resources of the planet with future generations must be considered to be part of the just basic structure of society The argument is based on a close study of Rawls theory of justice and particularly of its treatment of the future generations issue But the author claims that the affirmation of a principle of justice towards future generations must be accompanied by the attempt to articulate the motives that shape a concern with the fate of future persons in the first place In order to consider and further its real chances we must put the perspective of justice between generations with its very detached character within the context of our view from the present such as it is situated in historical time This opens a fascinating but difficult field of inquiry about inter generational value and its different aspects Although it is centred on the theory of justice and on general ethics the book also pays attention to the legal issues raised by the notion of a future oriented just basic structure of society
