Dominique Deuff, Mathilde Cosquer, 2013-10-28 Agile development methods began to emerge around 20 years ago However it was not until the early 2000s that they began to be widely used in industry This growth was often due to the advent of Internet services requiring faster cycles of development in order to heighten the rate at which an ever greater number of functionalities were made available In parallel user centered design UCD methods were also becoming more and more widely used hence user centered design and agile methods were bound to cross paths at least in the telecoms industry During this period in the field of telecommunications the explosion in the number of connected terminals Web applications new use environments particularly in a domestic setting etc meant it was crucial to gain a fuller understanding of users requirements and better evaluate the relevance and acceptance of services attempts to cater for these requirements Thus the user centered agile method as proposed in this book aims to mutually integrate two existing methods user centered design as used by ergonomists and the agile Scrum method as used by developers The user testing method is also covered Analyzing work on this subject spanning the past 10 years the authors also provide an assessment of the feedback on the user centered agile method The method described in this book has been based on all these sources It is a framework relying on the logic introduced by Scrum i.e. a framework based on project management The method proposed is seen as an extension of Scrum which is centered on humans because of the integration of user centered design and user testing Therefore the description of the user centered agile method is based on the basics of the agile Scrum method and uses its terminology and elements As well as descriptive elements of the user centered agile method practical examples of how to implement it are also provided Contents 1 Introduction 2 Introduction to the Methods Employed 3 Sources for this Work 4 Description of The User Centered Agile Method 5 Case Studies About the Authors Dominique Deuff worked at the National Institute of Informatics in Japan for 21 2 years before coming back to France in June 2006 and joining Orange Labs France Telecom as a developer in a

Scrum team In 2008 she graduated with a Master s degree in ergonomics and has since then been applying her new skills to various projects at Orange Labs Lannion Mathilde Cosquer joined Orange Labs as an ergonomist after completing her PhD on the question of transparency of technical devices from the user s point of view She has taken part in the design and evaluation of numerous innovating services but over the past four years she has been more particularly involved in projects of interpersonal communication services *Networks and Telecommunications* Deuff,2013-05-21 **Integrating User-Centred Design in Agile Development** Gilbert Cockton,Marta Lárusdóttir,Peggy Gregory,Åsa Cajander,2016-09-30 This book examines the possibilities of incorporating elements of user centred design UCD such as user experience UX and usability with agile software development It explores the difficulties and problems inherent in integrating these two practices despite their relative similarities such as their emphasis on stakeholder collaboration Developed from a workshop held at NordiCHI in 2014 this edited volume brings together researchers from across the software development UCD and creative design fields to discuss the current state of the art Practical case studies of integrating UCD in Agile development across diverse contexts are presented whilst the different futures for UCD and other design practices in the context of agile software development are identified and explored Integrating User Centred Design in Agile Development will be ideal for researchers designers and academics who are interested in software development user centred design agile methodologies and related areas **Can User-centered Design Techniques be Effectively Incorporated Into Agile Software Development Processes?** Matthew Maunder,2007
