What Works In Development Thinking Big And Thinking Small:

What Works in Development? Jessica Cohen, William Easterly, 2010-02-01 What Works in Development brings together leading experts to address one of the most basic yet vexing issues in development what do we really know about what works and what doesn't in fighting global poverty The contributors including many of the world's most respected economic development analysts focus on the ongoing debate over which paths to development truly maximize results Should we emphasize a big picture approach focusing on the role of institutions macroeconomic policies growth strategies and other country level factors Or is a more grassroots approach the way to go with the focus on particular microeconomic interventions such as conditional cash transfers bed nets and other microlevel improvements in service delivery on the ground The book attempts to find a consensus on which approach is likely to be more effective Contributors include Nana Ashraf Harvard Business School Abhijit Banerjee MIT Nancy Birdsall Center for Global Development Anne Case Princeton University Jessica Cohen Brookings William Easterly NYU and Brookings Alaka Halla Innovations for Poverty Action Ricardo Hausman Harvard University Simon Johnson MIT Peter Klenow Stanford University Michael Kremer Harvard Ross Levine Brown University Sendhil Mullainathan Harvard Ben Olken MIT Lant Pritchett Harvard Martin Ravallion World Bank Dani Rodrik Harvard Paul Romer Stanford University and David Weil Brown

The Oxford Handbook of International Law and Development Ruth Buchanan, Luis Eslava, Sundhya Pahuja, 2024-02-15 The Oxford Handbook of International Law and Development is a unique overview of the field of international law and development examining how normative beliefs and assumptions around development are instantiated in law and critically examining disciplinary frameworks competing agendas legal actors and institutions and alternative futures

Less Pretension, More Ambition Peter van Lieshout, Robert Went, Monique Kremer, 2010 Ontwikkelingshulp heeft onder de Nederlandse bevolking nog altijd een groot draagvlak zo blijkt uit opinieonderzoek Maar de twijfels nemen toe Ook in de media worden steeds meer vraagtekens geplaatst bij de effecten van hulp Met name de situatie in Afrika stelt velen teleur Waarom geven we eigenlijk ontwikkelingshulp en helpt die hulp Wat weten we over ontwikkelingstrajecten van landen en over de mogelijkheid daar van buiten aan bij te dragen Hoe relevant is hulp nog voor ontwikkelingslanden nu andere financiële stromen zoals remittances en buitenlandse investeringen FDI door globalisering zijn toegenomen En heeft beleid gericht op thema's als klimaat migratie financiële stabiliteit kennis handel en veiligheid niet meer invloed op de ontwikkelingskansen van arme landen Deze en andere vragen komen aan bod in dit rapport van de Wetenschappelijke Raad voor het Regeringsbeleid Op basis van bijna vijfhonderd gesprekken in het veld en een uitgebreide bestudering van de literatuur formuleert de WRR aanbevelingen voor forse wijzigingen in de organisatie van ontwikkelingshulp en voor gestructureerde aandacht voor terreinen die ontwikkelingsrelevant zijn en voor mondiale publieke goederen

Human Capital Cosimo Perrotta, Salvatore Rizzello, Claudia Sunna, 2023-07-29 This book presents a new interpretation of the role of human capital and the state in driving economic development It places these ideas within

broader debates within the history of economic thought to highlight how the nature of economic activity is a collective and coordinated process Through examining how the welfare state reversed traditional accumulation by relying on human capital growth the importance of the state within the development process is emphasised alongside the multifaceted nature of competition Different forms of public expenditure are then evaluated to identify the most productive forms of public spending and the drivers of long term economic development This book questions the relationship between profits and rent and proposes a new kind of economic development based around human capital It will be relevant to students and researchers interested in the history of economic thought the political economy and labour economics **Mistaking Africa** Curtis

Keim,Carolyn Somerville,2021-12-27 For many in the west the mention of Africa immediately conjures up images of safaris ferocious animals sparsely dressed tribesmen and impenetrable jungles Newspaper headlines rarely touch on Africa but when they do they often mention authoritarian rule corruption genocide devastating illnesses or civil war Advertising movies amusement parks cartoons and many other corners of society all convey strong mental images of the continent that together form a collective consciousness Few think to question these perceptions or how they came to be so deeply lodged in western minds Mistaking Africa looks at the historical evolution of this mind set and examines the role that popular media plays in its creation The authors address the most prevalent myths and preconceptions and demonstrate how these prevent a true understanding of the enormously diverse peoples and cultures of Africa Updated throughout the fifth edition considers images of Africa from across the world and provides new analysis of what Africans are doing themselves to rewrite the stories of their continent particularly through social and digital media Mistaking Africa is an important book for African studies courses and for anyone interested in unraveling misperceptions about the continent **No Miracle** Mitchell

Wigdor,2016-05-23 No Miracle examines the role of institutions in bridging the digital divide between rich and poor nations and what that means for the country s integration into a global economy Shifting the debate from whether institutions are important to economic development to which institutions are important and how to build them Mitchell Wigdor expertly addresses fundamental shortcomings in the existing development literature by identifying specific institutions that mediate the relationship between Information and Communications Technology ICT and economic growth In doing so he challenges those concerned with development to shift their gaze from whether institutions are important to economic development to which institutions might be the focus of government efforts and how to build them Detailed case studies of the economic development strategies of Singapore and Malaysia from 1960 demonstrate that institution building and economic development may be as much about process as the specific policies governments pursue Written in accessible non technical language this book should be read by everyone concerned with economic growth both in less economically developed countries and the more prosperous including those in government international organizations NGOs universities policy makers and the private sector Inequality and Fiscal Policy Mr.Benedict J. Clements,Ruud A. de Mooij,Mr.Sanjeev

Gupta, Mr. Michael Keen, 2015-09-21 The sizeable increase in income inequality experienced in advanced economies and many parts of the world since the 1990s and the severe consequences of the global economic and financial crisis have brought distributional issues to the top of the policy agenda The challenge for many governments is to address concerns over rising inequality while simultaneously promoting economic efficiency and more robust economic growth The book delves into this discussion by analyzing fiscal policy and its link with inequality Fiscal policy is the government's most powerful tool for addressing inequality It affects households' consumption directly through taxes and transfers and indirectly via incentives for work and production and the provision of public goods and individual services such as education and health An important message of the book is that growth and equity are not necessarily at odds with the appropriate mix of policy instruments and careful policy design countries can in many cases achieve better distributional outcomes and improve economic efficiency Country studies on the Netherlands China India Republic of Congo and Brazil demonstrate the diversity of challenges across countries and their differing capacity to use fiscal policy for redistribution The analysis presented in the book builds on and extends work done at the IMF and also includes contributions from leading academics

Randomized Control Trials in the Field of Development Florent Bédécarrats, Isabelle Guérin, François Roubaud, 2020-09-17 This is an open access title available under the terms of a CC BY NC ND 4.0 International licence It is free to read at Oxford Academic and offered as a free PDF download from OUP and selected open access locations In October 2019 Abhijit Banerjee Esther Duflo and Michael Kremer jointly won the 51st Sveriges Riksbank Prize in Economic Sciences in Memory of Alfred Nobel for their experimental approach to alleviating global poverty But what is the exact scope of their experimental method known as randomized control trials RCTs Which sorts of questions are RCTs able to address and which do they fail to answer The first of its kind **Randomized Control Trials in the Field of Development: A Critical Perspective** provides answers to these questions explaining how RCTs work what they can achieve why they sometimes fail how they can be improved and why other methods are both useful and necessary Bringing together leading specialists in the field from a range of backgrounds and disciplines economics econometrics mathematics statistics political economy socioeconomics anthropology philosophy global health epidemiology and medicine it presents a full and coherent picture of the main strengths and weaknesses of RCTs in the field of development Looking beyond the epistemological political and ethical differences underlying many of the disagreements surrounding RCTs it explores the implementation of RCTs on the ground outside of their ideal theoretical conditions and reveals some unsuspected uses and effects their disruptive potential but also their political uses The contributions uncover the implicit worldview that many RCTs draw on and disseminate and probe the gap between the method's narrow scope and its success while also proposing improvements and alternatives Without disputing the contribution of RCTs to scientific knowledge **Randomized Control Trials in the Field of Development** warns against the potential dangers of their excessive use arguing that the best use for RCTs is not necessarily that which immediately springs to mind Written in plain language this

book offers experts and laypeople alike a unique opportunity to come to an informed and reasoned judgement on RCTs and what they can bring to development City Power Richard C. Schragger, 2016 Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In City Power Richard Schragger challenges this conventional wisdom arguing that cities can and should pursue aims other than making themselves attractive to global capital Using the municipal living wage movement as an example Schragger explains why cities are well positioned to address issues like income equality and how our institutions can be designed to allow them to do so The Education of Nations Stephen Kosack, 2012-07-25 What causes a government to invest or not invest in poor citizens especially mass education In The Education of Nations Stephen Kosack focuses on three radically different developing countries whose developmental trajectories bear little resemblance to each other Brazil Ghana and Taiwan and offers an elegant and pragmatic answer to this crucially important question
