Whats Left How Liberals Lost Their Way:

What's Left? Nick Cohen, 2007 As he tours the follies of the Left Nick Cohen asks us to consider what it means to be liberal in this confused and topsy turvy time The Future of Liberalism Alan Wolfe, 2010-02-09 A compelling and deeply felt exploration and defense of liberalism what it actually is why it is relevant today and how it can help our society chart a forward course The Future of Liberalism represents the culmination of four decades of thinking and writing about contemporary politics by Alan Wolfe one of America s leading scholars hailed by one critic as one of liberalism s last and most loyal sons Wolfe mines the bedrock of the liberal tradition explaining how Immanuel Kant John Stuart Mill John Dewey and other celebrated minds helped shape liberalism s central philosophy Wolfe also examines those who have challenged liberalism since its inception from Jean Jacques Rousseau to modern conservatives religious fundamentalists and evolutionary theorists such as Richard Dawkins Drawing on both the inspiration and insights of seminal works such as John Locke s Second Treatise on Government Adam Smith s Theory of Moral Sentiments Kant s essay What is Enlightenment and Mill s On Liberty and The Subjection of Women Wolfe ambitiously sets out to define what it truly means to be a liberal He analyzes and applauds liberalism s capacious conception of human nature belief that people outweigh ideology passion for social justice faith in reason and intellectual openness and respect for individualism And we see how the liberal tradition can influence and illuminate contemporary debates on immigration abortion executive power religious freedom and free speech But Wolfe also makes it clear that before liberalism can be successfully applied to today s problems it needs to be recovered understood and embraced not just by Americans but by all modern people as the most beneficial way to live in our complex modern world The Future of Liberalism is a crucial enlightening and immensely rewarding step in that direction Come from the Shadows Terry Glavin, 2011 An award winning journalist overturns western stereotypes as he takes readers as he takes readers outside the wire of the war in Afghanistan and introduces the people whose defiant courage offers hope for the future Far from the Taliban s grim desert strongholds the country we visit with Terry Glavin is a surprisingly welcoming place hidden away in alleys and narrow streets that bustle with blacksmiths gem hawkers and spice merchants This is the unseen Afghanistan reawakening from decades of savagery and bloodletting Glavin shows us how events have unfolded in Afghanistan since September 11 2001 Travelling with fluent interpreters and Afghan human rights activists Glavin meets people from many walks of life key political figures teachers journalists farmers students burqa shrouded women and soccer players and in these pages they speak for themselves And in the life story of Afghan Canadian writer translator and activist Abdulrahim Parwani he finds the story of Afghanistan s agonies over the past 30 years Celebrated as a critical voice in the dialogue that sustains a civil society Glavin is a co founder of the Canada Afghanistan Solidarity Committee and is increasingly seen as an expert on Canada s role in Afghanistan He is also one of the best writers we have Come from the Shadows mounts a passionately marvellously readable challenge to the usual depiction of the war in Afghanistan What Glavin

asks has made the West incapable of hearing the voices of Afghans at the forefront of the global struggle against slavery misogyny and tyranny His answers are often unexpected and always illuminating

Curriculum Challenges for Universities James Nyland, David Davies, 2022-03-01 This book develops a progressive program of engagement with issues problems and critical thinking which helps universities and students understand and engage with some of the key issues of our time It focuses on curriculum concerns and presents a sustained and critical analysis and dialogue about knowledge culture and ways of seeing important issues This book provides critical and analytical insights into the importance of the emergence of mass higher education into public awareness It explores what is termed contested knowledge as part of modern students experiences and expectations By broadcasting some of the future prospects for a democratic university especially in relation to its communities it highlights the need to grasp the significance of global change and instability in teaching and learning and how an adequate curriculum in higher education can be constructed to address the issues that arise

Muslims and Political Participation in Britain Timothy Peace, 2015-05-01 This new volume showcases the latest research into Muslim political participation both in terms of electoral politics and civil society initiatives Muslims play a prominent role in British political life yet what do we actually know about the involvement of British Muslims beyond the existence of a handful of Muslim MPs What is unique about political participation in Muslim communities All the major parties actively seek to court a Muslim electorate but does such a phenomenon exist Despite the impact that Muslims have had on election campaigns and their roles in various political institutions research on this topic remains scant Indeed much of the existing work was couched within the broader areas of the participation of ethnic minorities or the impact of race on electoral politics The chapters in this volume address this lacuna by highlighting different aspects of Muslim participation in British politics They investigate voting patterns and election campaigns civil society and grassroots political movements the engagement of young people and the participation of Muslims in formal political institutions Written in an accessible style this book will be of interest to students and scholars of political participation and religious studies

Fresh Perspectives on the 'War on Terror' Miriam Gani, Penelope Mathew, 2008-07-01 On 20 September 2001 in an address to a Joint Session of Congress and the American people President George W Bush declared a war on terror The concept of the war on terror has proven to be both an attractive and a potent rhetorical device It has been adopted and elaborated upon by political leaders around the world particularly in the context of military action in Afghanistan and Iraq But use of the rhetoric has not been confined to the military context The war on terror is a domestic one also and the phrase has been used to account for broad criminal legislation sweeping agency powers and potential human rights abuses throughout much of the world This collection seeks both to draw on and to engage critically with the metaphor of war in the context of terrorism It brings together a group of experts from Australia Canada the United Kingdom France and Germany who write about terrorism from a variety of disciplinary perspectives including international law and international relations public and constitutional law criminal law

and criminology legal theory and psychology and law **Thinking Palestine** Ronit Lentin, 2013-07-18 This book brings together an inter disciplinary group of Palestinian Israeli American British and Irish scholars who theorise the question of Palestine Critically committed to supporting the Palestinian quest for self determination they present new theoretical ways of thinking about Palestine These include the Palestinization of ethnic and racial conflicts the theorization of Palestine as camp ghetto and prison the tourist activist gaze the role of gendered resistance the centrality of the memory of the 1948 Nakba catastrophe to the contemporary understanding of the conflict and the historic roots of the contemporary discourse on Palestine The book offers a novel examination of how the Palestinian experience of being governed under what Giorgio Agamben names a state of exception may be theorised as paradigmatic for new forms of global governance An indispensable read for any serious scholar **Discourses and Practices of Terrorism** Bob Brecher, Mark Devenney, Aaron

Winter, 2010-02-25 This interdisciplinary book investigates the consequences of the language of terror for our lives in democratic societies The approach of this book is in direct contrast with those that either view terrorism simplistically as a clear reality threatening democratic society and thus requiring certain sorts of response or argue equally simplistically that the invocation of terror is merely the ideological veil for continued capitalist exploitation While closer in spirit to the second of these this work does not simply dismiss the discourse on terror but rather investigates the consequences of this discourse for the organisation of life in democratic societies In interrogating the discourse of terror from a variety of viewpoints this interdisciplinary text builds upon the understanding of the importance of the language of terror from a new perspective the interconnections between discourses of terror the material realities they at once reflect and help produce and the specificities of particular historical circumstances In offering an integrated approach of this sort and founded on a base of applied philosophy broadly conceived the contributors offer a new contribution to both public and academic debate and at the same time initiate a series of further interventions in Critical Terrorism Studies This book will be of interest to students of critical terrorism studies terrorism studies security studies philosophy and discourse theory Bob Brecher is Director of the Centre for Applied Philosophy Politics Ethics at Brighton University He has published widely in moral political and applied philosophy and the politics of higher education Mark Devenney is Academic Programme Leader in Humanities at the University of Brighton He has published in the areas of critical theory post Marxism and post Colonial politics Aaron Winter is Lecturer in Sociology at the University of Abertay Dundee His research focuses on terrorism and the concept of extremism whiteness masculinity and violence and the extreme right organised racism and the religious right in the United States

Muslims in 21st Century Europe Anna Triandafyllidou, 2010-04-05 This book explores the interaction between native majorities and Muslim minorities in different European countries It highlights the internal diversity of both minority and majority populations and critically analyses the political and institutional responses to the presence of Muslims The book also looks at how national governments and other stakeholders construct Muslim difference in public discourse

Islamophobia and Radicalisation Tahir Abbas, 2019-11-01 Since the 1970s there have been three challenges to traditional homogeneous national identities across the Western world: political and socioeconomic inequality, neoliberal globalization, and more diverse multicultural societies. As in the US and elsewhere in Western Europe, the decline of an old masculinized national identity has now begun to open a new dark era for Britain. Ever since the war on terror was added to the mix, others in Britain have been brutally demonized. Muslims routinely presented as the source of society's ills are subjected to both symbolic and actual violence. Deep-seated and structurally racialized norms amplify the isolation and alienation impeding Muslim integration. Both these left behind Muslims and white British groups who perceive themselves as the true nation are under pressure from ongoing geopolitical concerns in the Muslim world as well as widening divisions at home. Tahir Abbas argues that in this context the symbiotic intersections between Islamophobia and radicalization intensify and expand. His book is a warning of the world that results: a rise in hate crime, the institutionalization of Islamophobia, and the normalization of war and conflict.
