Order, Materiality, and Urban Space in the Early Modern Kingdom of Sweden Riitta Laitinen, 2025-10-01 Our corporeality and immersion in the material world make us inherently spatial beings and the fact that we all share everyday experiences in the global physical environment means that community is also spatial by nature This book explores the relationship between the seventeenth century townspeople of Turku Sweden and their urban surroundings Riitta Laitinen offers a novel account of civil and social order in this early modern town highlighting the central importance of materiality and spatiality and breaking down the dichotomy of public versus private life that has dominated traditional studies of the time period

Posthuman Subjectivity in the Novels of J.G. Ballard Carolyn Lau, 2023-07-28 This book proposes that Ballard's novels extrapolate the formation of a posthuman subjectivity that is centred around an affirmative understanding of what a human body can do This new subjectivity transforms constraints and prescribed desires into creative openings in a hyper mediated control society that conditions docile bodies through technology and consumerism Set in surrealist predicaments in postwar affluent Western societies Ballard's novels remind us of the fragile veneer of order in the familiar every day In these moments of crisis complacent characters are compelled to undergo a process of defamiliarisation and transformation of their understanding of the self and the body The ability to form new relationships with the unfamiliar is imperative to survival in a hostile

environment Ballard delineates both the possibilities and obstacles of forming these relationships In particular the author attributes the failure to do so to the irreconcilable contradictions of late capitalism The New Urban Condition Leandro Medrano,Luiz Recamán,Tom Avermaete,2021-04-07 This book explores new architectural and design perspectives on the contemporary urban condition While architects and urban designers have long maintained that their actions drawings and buildings are post critical this book seeks to expand the critical dimension of architecture and urbanism In a series of historical and theoretical studies this book examines how the materialities forms and practices of architecture and urban design can act as a critique towards the new urban condition It proposes not only new concepts and theories but also instruments of analysis and reflection to better understand the current counter hegemonic tendencies in both disciplinary strategies and appropriation tactics The diversely international selection of chapters from Brazil Portugal Spain Sweden the United States and the Netherlands combine different theoretical and empirical perspectives into a new analysis of the city and architecture Demonstrating the need for new critical urban and architectural thinking that engages with the challenges and processes of the contemporary urban condition this volume will be a thought provoking read for academics and students in architecture urban design geography political science and more
