To Save Everything, Click Here Evgeny Morozov, 2013-03-05 A New York Times Notable Book of the Year In the very near future smart technologies and big data will allow us to make large scale and sophisticated interventions in politics culture and everyday life Technology will allow us to solve problems in highly original ways and create new incentives to get more people to do the right thing But how will such solutionism affect our society once deeply political moral and irresolvable dilemmas are recast as uncontroversial and easily manageable matters of technological efficiency What if some such problems are simply vices in disguise What if some friction in communication is productive and some hypocrisy in politics necessary The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behavior But when we change the motivations for our moral ethical and civic behavior we may also change the very nature of that behavior Technology Evgeny Morozov proposes can be a force for improvement but only if we keep solutionism in check and learn to appreciate the imperfections of liberal democracy Some of those imperfections are not accidental but by design Arguing that we badly need a new post Internet way to debate the moral consequences of digital technologies **To Save Everything Click Here** warns against a world of seamless efficiency where everyone is forced to wear Silicon Valley's digital straitjacket [To Save Everything, Click Here](#) Evgeny

Morozov, 2013-03-21 **To Save Everything Click Here** the new book by the acclaimed author of *The Net Delusion* Evgeny Morozov is a penetrating look at the shape of society in the digital age of the direction in which the 21st Century may take us and of the alternate paths we can still choose Our society is at a crossroads Smart technology is transforming our world making many aspects of our lives more convenient efficient and in some cases fun Better and cheaper sensors can now be embedded in almost everything and technologies can log the products we buy and the way we use them But argues Evgeny Morozov technology is having a more profound effect on us it is changing the way we understand human society In the very near future technological systems will allow us to make large scale and sophisticated interventions into many more areas of public life These are the discourses by which we have always defined our civilisation politics culture public debate morality humanism But how will these discourses be affected when we delegate much of the responsibility for them to technology The temptation of the digital age is to fix everything from crime to corruption to pollution to obesity by digitally quantifying tracking or gamifying behaviour Yet when we change the motivations for our moral ethical and civic behaviour do we also change the very nature of that behaviour Technology Morozov proposes can be a force for improvement but only if we abandon the idea that it is necessarily revolutionary and instead genuinely interrogate why and how we are using it From urging us to drop outdated ideas of the internet to showing how to design more humane and democratic technological solutions **To Save Everything Click Here** is about why we should always question the way we use technology A devastating exposé of cyber utopianism by the world's most far seeing Internet guru John Gray author of *Straw Dogs* Evgeny Morozov is

the most challenging and best informed critic of the Techno Utopianism surrounding the Internet If you ve ever had the niggling feeling as you spoon down your google that there s no such thing as a free lunch Morozov s book will tell you how you might end up paying for it Brian Eno This hard hitting book argues people have become enslaved to the machines they use to communicate It is incisive and beautifully written whether you agree with Morozov or not he will make you think hard Richard Sennett author of Together Praise for The Net Delusion Gleefully iconoclastic not just unfailingly readable it is also a provocative enlightening and welcome riposte to the cyberutopian worldview Economist A passionate and heavily researched account of the case against the cyberutopians only by becoming cyberrealists can we hope to make humane and effective policy Bryan Appleyard New Statesman Piercing convincing timely Financial Times Evgeny Morozov is the author of The Net Delusion The Dark Side of Internet Freedom which was the winner of the 2012 Goldsmith Book Prize and a contributing editor for The New Republic Previously he was a visiting scholar at Stanford University a Scwhartz fellow at the New America Foundation a Yahoo fellow at the Institute for the Study of Diplomacy at Georgetown and a fellow at the Open Society Foundations His monthly column on technology comes out in Slate Corriere della Sera El Pais Frankfurter Allgemeine Zeitung and several other newspapers He s also written for the New York Times The Economist the Wall Street Journal the Financial Times and the London Review of Books

The Human Imperative Paul Nemitz,2023-11-25 This important new book is about power in the age of Artificial Intelligence It looks at what the new technical powers that have accrued over the last decades mean for the freedom of people and for our democracies AI must not be considered in isolation but rather in a very specific context the concentration of economic and digital technological power that we see today Analysis of the effects of AI requires that we take a holistic view of the business models of digital technologies and of the power they exercise Technology economic power and political power are entering into ever closer symbiosis Digital technologies and their corporate masters now know more than people know about themselves or governments know about the world These technologies accumulate more and more decision making powers Taken together this leads to a massive asymmetry of knowledge and power in the relationship between man and machine The classical models of action and decision making in democratic societies are being gradually undermined by such developments In a new way the question of the control of technical power arises This is the first book to look in detail in a holistic way at the challenges of digital power and Artificial Intelligence to Democracy and Liberties and to set out what can and needs to be done about these challenges in terms of engineering ethics and democratic action of policy making and legislation Key audiences are scholars in media sciences political sciences computer sciences and engineering law and philosophy as well as policy makers corporate and civil society leaders and the educated public Adapted and updated from the original German language book Prinzip Mensch Macht Freiheit und Demokratie im Zeitalter der Künstlichen Intelligenz published 2020 by Verlag J H W Dietz Nachf GmbH

The Movies as a World Force Ryan Jay Friedman,2019-02-04 Throughout the silent feature era American artists and intellectuals routinely described cinema as a force of global communion a universal language promoting mutual understanding and harmonious coexistence amongst disparate groups of people In the early 1920s film industry leaders began to espouse this utopian view in order to claim for motion pictures an essentially uplifting social function The Movies as a World Force examines the body of writing in which this understanding of cinema emerged and explores how it shaped particular silent films and their marketing campaigns The utopian and universalist view of cinema the book shows represents a synthesis of New Age spirituality and the new liberalism It provided

a framework for the first official written histories of American cinema and persisted as an advertising trope even after the transition to sound made movies reliant on specific national languages
