Virtual America John Opie, 2008-01-01 Virtual America traces the complex relationship between Americans technology and their environment as it has unfolded over the past several centuries Throughout history Americans have constructed mental pictures of unique places such as the American West that have taken on more authority than the actual gritty landscapes This disconnect from reality is magnified by the new world of virtual realities on the computer screen where personal immersion in interactive simulations becomes the default environment Virtual America identifies the connections or lack thereof between our individual selves an American identity and the geography out there John Opie examines what he calls First Nature the natural world Second Nature metropolitan infrastructure built environment and Third Nature virtual reality in cyberspace He also explores how Americans have historically dreamed about a better life in daily ordinary existence and then fulfilled it through the Engineered America of our built environment the Consumer America of material well being and the Triumphal America of our conviction that we are the world s exceptional model But these dream worlds have also encouraged placelessness and thus indifference to our dwelling in home ground Finally Opie explores Last Nature a sense of place and argues that when we identify an authentic place we can locate authenticity of self a reification of place and self by their connectedness

**Green Voices** Richard D. Besel, Bernard K. Duffy, 2016-02-25 The written works of nature s leading advocates from Charles Sumner and John Muir to Rachel Carson and President Jimmy Carter to name a few have been the subject of many texts but their speeches remain relatively unknown or unexamined Green Voices aims to redress this situation After all when it comes to the leaders heroes and activists of the environmental movement their speeches formed part of the fertile earth from which uniquely American environmental expectations assumptions and norms germinated and grew Despite having in common a definitively rhetorical focus the contributions in this book reflect a variety of methods and approaches Some concentrate on a single speaker and a single speech Others look at several speeches Some are historical in orientation while others are more theoretical In other words this collection examines the broad sweep of US environmental history from the perspective of our most famous and influential environmental figures This book is freely available in an open access edition thanks to Knowledge Unlatched an initiative that provides libraries and institutions with a centralized platform to support OA collections and from leading publishing houses and OA initiatives Learn more at the Knowledge Unlatched website at <https://www.knowledgeunlatched.org> and access the book online at the SUNY Open Access Repository at <http://hdl.handle.net/20.500.12648/7126>

*Communicating Environmental Patriotism* Anne Marie Todd, 2013-06-07 Environmental patriotism the belief that the national environment defines a country s greatness is a significant strand in twentieth century American environmentalism This book is the first to explore the history of environmental patriotism in America through the intriguing stories of environmental patriots and the rhetoric of their speeches and propaganda The See America First movement began in 1906 with the aim of protecting and promoting the

landscapes of the American West In 1908 Gifford Pinchot and President Theodore Roosevelt hosted the White House Conservation Conference to promote the wise use of natural resources for generations of Americans In 1912 Pittsburgh's smoke investigation condemned the effects of coal smoke on the city's environment In World War II a massive propaganda effort mobilized millions of Americans to plant victory gardens to save resources for the war abroad While these may not seem like crucial moments for the American environmental movement this new history of American environmentalism shows that they are linked by patriotism The book offers a provoking critique of environmentalists communication strategies and suggests patriotism as a persuasive hook for new ways to make environmental issues a national priority This original research should be of interest to scholars of environmental communication environmental history American history and environmental philosophy

Vinyl Records and Analog Culture in the Digital Age Paul E. Winters, 2016-07-18 Vinyl Records and Analog Culture in the Digital Age Pressing Matters examines the resurgence of vinyl record technologies in the twenty first century and their place in the history of analog sound and the recording industry It seeks to answer the questions why has this supposedly outmoded format made a comeback in a digital culture into which it might appear to be unwelcome Why in an era of disembodied pleasures afforded to us in this age of cloud computing would listeners seek out this remnant of the late nineteenth century and bring it seemingly back from the grave Why do many listeners believe vinyl with its obvious drawbacks to be a superior format for conveying music to the relatively noiseless CD or digital file This book looks at the ways in which music technologies are both inflected by and inflect human interactions creating discourses practices disciplines and communities

Undermined in Coal Country Bill Conlogue, 2017-10-15 A study of lives and landscapes in Pennsylvania's Lackawanna Valley and what the region's history of mining reveals about human folly and endeavor The Chronicle of Higher Education Deep mining ended decades ago in Pennsylvania's Lackawanna Valley The barons who made their fortunes have moved on Low wages and high unemployment haunt the area and the people left behind wonder whether to stay or seek their fortunes elsewhere Bill Conlogue explores how two overlapping coal country landscapes Scranton Pennsylvania and Marywood University have coped with the devastating aftermath of mining Examining the far reaching environmental effects of mining this beautifully written book asks bigger questions about what it means to influence a landscape to this extent and then to live in it In prose rivaling that of Annie Dillard and John McPhee Conlogue argues that if we are serious about solving environmental problems if we are serious about knowing where we are and what happens there we need to attend closely to all places that is to attend to the world in a cold dark and disorienting universe Unearthing new ways of thinking about place pedagogy and the environment this meditative text reveals that place is inherently unstable
