Analytic Projective Geometry John Bamberg, Tim Penttinen, 2023-10-19 Projective geometry is the geometry of vision and this book introduces students to this beautiful subject from an analytic perspective emphasising its close relationship with linear algebra and the central role of symmetry Starting with elementary and familiar geometry over real numbers readers will soon build upon that knowledge via geometric pathways and journey on to deep and interesting corners of the subject Through a projective approach to geometry readers will discover connections between seemingly distant and ancient results in Euclidean geometry By mixing

recent results from the past 100 years with the history of the field this text is one of the most comprehensive surveys of the subject and an invaluable reference for undergraduate and beginning graduate students learning classic geometry as well as young researchers in computer graphics Students will also appreciate the worked examples and diagrams throughout

Architectures of the Near Future Nic Clear, 2009-10-12 In this highly pertinent issue guest editor Nic Clear questions received notions of the future Are the accepted norms of economic growth and expansion the only means by which society can develop and prosper Should the current economic crisis be making us call into question a future of unlimited growth Can this moment of crisis economic environmental and technological enable us to make more informed choices about the type of future that we want and can actually achieve *Architectures of the Near Future* offers a series of alternative voices developing some of the neglected areas of contemporary urban life and original visions of what might be to come Rather than providing simplistic and seductive images of an intangible shiny future it rocks the cosy world of architecture with polemical blasts Draws on topics as diverse as synthetic space psychoanalysis Postmodern geography post economics cybernetics and developments in neurology Includes an exploration of the work of JG Ballard Features the work of Ben Nicholson

MediaArtHistories Oliver Grau, 2010-08-13 Leading scholars take a wider view of new media placing it in the context of art history and acknowledging the necessity of an interdisciplinary approach in new media art studies and practice Digital art has become a major contemporary art form but it has yet to achieve acceptance from mainstream cultural institutions it is rarely collected and seldom included in the study of art history or other academic disciplines In *MediaArtHistories* leading scholars seek to change this They take a wider view of media art placing it against the backdrop of art history Their essays demonstrate that today's media art cannot be understood by technological details alone it cannot be understood without its history and it must be understood in proximity to other disciplines film cultural and media studies computer science philosophy and sciences dealing with images Contributors trace the evolution of digital art from thirteenth century Islamic mechanical devices and eighteenth century phantasmagoria magic lanterns and other multimedia illusions to Marcel Duchamp's inventions and 1960s kinetic and op art They reexamine and redefine key media art theory terms machine media exhibition and consider the blurred dividing lines between art products and consumer products and between art images and
