Winning The Future A 21st Century Contract With America:

Winning the Future Newt Gingrich, 2005-01-10 According to former House Speaker Newt Gingrich America currently faces five threats that could undermine if not eliminate the United States if immediate steps are not taken to correct them The threats as he sees them are Islamic terrorists and rogue dictatorships armed with nuclear or biological weapons the removal of God from American public life a loss of patriotism and sense of America s history a decline in economic supremacy because of poor science and math education and the increasing budgetary burden of Social Security and Medicare To tackle these problems Gingrich offers his 21st Century Contract with America which he outlines in great detail in this bold and thought provoking book His updated contract which comes a decade after the original Republican Contract with America that marked the high point of Gingrich s national power calls for a dramatically simplified tax code that favors savings and investment government investment in science and technology particularly regarding space energy and the environment transforming Social Security into personal savings accounts overhauling the civil justice system to reduce the burden of lawsuits and updating the federal government including the privatization of some functions so that it moves at the speed and effectiveness of the information age And that s just the beginning He also calls for tripling the size of America s intelligence community reforming its election system developing a more intelligent health care system that creates jobs and increases quality of life and balancing the federal budget Gingrich believes that this ambitious agenda can be accomplished but only if it receives grassroots support The entrenched political system with its lobbyists bloated bureaucracies and the complicity of the media is too self serving to fix itself he stresses Concise and clearly presented **Winning the Future** is long on specifics and short on rhetoric and it succeeds as a springboard for political discourse Gingrich s aim is clearly to inspire citizens to take responsibility for the country s direction by demanding more of their government and their leaders

Winning the Future

Newt Gingrich, 2006-05-01 America s future in the twenty first century argues Newt Gingrich will be determined by the decisions we make now His book is a grass roots call to action and will set the debate for the new administration and Congress

know The Thirteen American Arguments Howard Fineman, 2009-03-10 Howard Fineman one of our most trusted political journalists shows that every debate from our nation's founding to the present day is rooted in one of thirteen arguments that thankfully defy resolution. It is the very process of never ending argument Fineman explains that defines us, inspires us and keeps us free. At a time when most public disagreement seems shrill and meaningless, Fineman makes a cogent case for nurturing the real American dialogue. The Thirteen American Arguments runs the gamut including Who Is a Person? The Declaration of Independence says everyone, but it took a Civil War, the Civil Rights Act and other movements to make that a reality. Now what about human embryos and prisoners in Guantanamo? The Role of Faith: No country is more legally secular yet more avowedly prayerful. From Thomas Jefferson to James Dobson, the issue persists: Where does God fit in government? America in the World: In Iraq and everywhere else we ask ourselves whether we must change the world in order to survive and honor our values or whether the best way to do both is to deal with the world as it is. Whether it's the nomination of judges or the limits of free speech, presidential power or public debt, the issues that galvanized the Founding Fathers should still inspire our leaders, thinkers and fellow citizens. If we cease to argue about these things, we cease to be. Argument is strength, not weakness, says Fineman. As long as we argue, there is hope, and as long as there is hope, we will argue.

Improving Education in the US Rafael Yanushevsky, 2011 US education is in crisis. This history and analysis of the education system is an essential primer for parents, teachers and school administrators as well as parent teacher organizations, education majors, education administration majors, the media, politicians and everyone who wants to see American schools do a better job. The author considers the genesis of public schools in the United States, various aspects of public education systems from elementary school through university, trends in education and reform and issues that still need to be addressed. The book contains information about public and private organizations, think tanks, institutions and governmental bodies involved in public education reform. The book shows the deficiency of the existing education system and compares it to more efficient systems. The author shows that most of the existing approaches to improve education are based on the same foolish idea that as long as government spending on education is great enough, the improvement will follow. The bond between education and politics hinders progress in education. The problems facing schools as well as the recommended solutions are considered. The author cites multiple research attempts to improve the functioning of the existing education system that have still failed to bring any tangible results. He uses his specialized knowledge to explain what should be done for educational progress to become reality. **Empirically Based Interventions Targeting Social Problems** John S. Wodarski, Laura M. Hopson, 2019-11-12 This unique volume demonstrates the effectiveness of applying an evidence-based practice process to the solution of selected social problems. our beloved country and our very way of life **The Religious Case Against Belief** James P. Carse, 2008-05-29 An insightful explanation for why belief not religion keeps us in a perilous state of willful ignorance Through careful creative analysis James P Carse s *The Religious Case Against Belief* reveals a surprising truth What is currently criticized as religion is in fact the territory of belief Looking to both historical and contemporary crises Carse distinguishes religion from belief systems and pinpoints how the closed mindedness and hostility of belief has corrupted religion and spawned violence the world over Drawing on the lessons of Galileo Martin Luther Abraham Lincoln and Jesus Christ Carse creates his own brand of parable and establishes a new vocabulary with which to study conflict in the modern world Carse uses his wide ranging understanding of religion to find a viable and vital path away from what he calls the Age of Faith II and toward open ended global dialogue **A Constitutional Crisis** Warren Lee Grant, 2013-04-23 America is facing a constitutional crisis that threatens the continuation of the Republic as founded and structured The US Supreme Court is a primary agent in the rise expansion and promotion of this crisis By the employ of one of the amendments the Court continues its work of restructuring the governmental order established by the Constitution and of shifting the nation from its Christian foundation to one wholly secular Such actions by the Court raise very serious questions By what lawful authority does the Court engage in this work What are the driving motives behind the Courts stratagem What are some of the main consequences thus far produced Address is given to these questions as well as to the means of restoring constitutional order and limiting the powers of the Supreme Court to those specified Why Conservatives Tell Stories and Liberals Don't David M Ricci, 2015-12-03 Why do conservatives tell stories Because it helps them win elections and assail liberal policies like health care reform and economic stimulus Why is important but the what and the how behind the stories that conservatives tell are equally interesting and in this new book David Ricci reveals all He shows how conservative activists and candidates tell many tales that come together to project a large scale story a cultural narrative a vision of what America is and what it should do to prosper socially economically and politically Liberals by contrast tend to look for theories rather than stories for mathematical explanations rather than theological axioms for data rather than anecdotes and for statistics rather than homilies The difference is paradoxical Liberals are unlikely to fashion sweeping narratives that capture the public s attention and commitment Yet conservatives may tell attractive stories like the ones that got us into Iraq that momentarily capture voter support but end up costing the country more than it can afford **The A to Z of the Reagan-Bush Era** Richard S. Conley, 2009-09-28 The 1980s and early 1990s were remarkable for the triumph of conservatism in the United States and its closest allies The victories of Presidents Ronald Reagan and George H W Bush in the United States were complemented by the electoral successes of Margaret Thatcher in the United Kingdom and Brian Mulroney in Canada The relationship between Reagan and Bush and their conservative counterparts was particularly important in providing a united front on foreign policy whether the target was the Soviet Union Communist insurgencies in Africa or Latin America or Iraqi dictator Saddam Hussein The

Reagan Bush era witnessed some of the most dramatic events of the latter half of the 20th century the collapse of the Soviet Union a presidential assassination attempt political scandal a stock market crash military invasions and the explosion of the space shuttle Challenger The A to Z of the Reagan Bush Era relates these events and provides extensive political economic and social background on this era through a detailed chronology an introduction appendixes a bibliography and several hundred cross referenced dictionary entries on important persons events institutions policies and issues
