Spence, 2021-05-21 This book provides an applied model of corruption to identify analyse and assess the ethics of major types of corruption in the media involving practices such as cash for comment media release journalism including video news releases VNRs fake news deep fakes and staged news The book starts with a conceptual philosophical analysis of corruption in general followed by an in depth analysis of media corruption across its various transformations from the legacy media of the 4th Estate e g The UK Guardian to the digital media of the 5th Estate e g Social Media and Wikileaks to the Network Media of the 6th Estate e g Facebook and Google and provides key case studies as practical illustrations and contextualisation of those major types of media corruption It explains how the conversion of the two forms of media communication corporate and social digital communication as expressed in the symbiotic relationship between the 4th Estate and the 5th Estate exposes and enables the reporting of corruption signalling a major shift in the way the media itself can provide an effective means for anti corruption measures against major practices of corruption that would have otherwise gone unnoticed Global Perspectives on Probing Narratives in Healthcare Casal, Teresa, Cabral, Maria de Jesus, 2023-06-01 There is often a communication disconnect between medical caregivers including doctors nurses therapists and other assistive medical personnel and the patient While medical staff usually understand a patient s symptoms causes and treatments communicating this understanding to a patient using industry terminologies can lead to confusion and misunderstanding and similarly patients may lack the vocabulary to effectively communicate their experiences back to their caregivers A new approach to communication must be bridged between these groups by individuals who have experience on both sides of the conversation Previous studies of doctors who end up in the role of the patient reveal how these individuals have a dual perspective on illness combining their medical knowledge with their own personal medical experiences Narratives including autobiographical accounts and fictional stories can help bridge the gap between experiential and academic knowledge of illness by expanding one s limited perspective and accessing others points of view Autobiographical and fictional narratives can both play a role in developing a more comprehensive understanding of illness beyond simply treating the disease It is necessary to further examine the ethical and methodological underpinnings of narrative based interventions in the education of healthcare professionals practitioners and patients Global Perspectives on Probing Narratives in Healthcare offers a multidisciplinary examination of theoretical and methodological uses of narratives in healthcare by bringing together medical aspects of healthcare and the study of arts and humanities This illustrates specific applications of narratives in healthcare settings including improvement of clinical skills performance of the caring role and self efficacy for building a true partnership in the patient s health journey through varied approaches up to date tools and

born and it will be there after you leave It is beyond the distractions of the body conflicts with the emotions and the contradictions of the mind It is about who you are and listening to who you are It is to help you find your own direct knowledge with your energy and the truth in creating abundance and balance in your life It is about the stillness of your soul and all its inner harmonies which are your spiritual expression It brings forth your innocence truth blessings miracles consecration grace and living love You are a creative being whose keys to emergence lies deep within This emergence is beyond space and time and it plays as your inner verse You are poetry of being It is time for you to claim it and to love yourself and all the other sources within you It is your soul awareness
