Zaaizaad En Plantgoedwet:

The functional field of food law Altinay Urazbaeva, Anna Szajkowska, Bart Wernaart, Nikolaas Tilkin Franssens, Rozita Spirovska Vaskoska, 2023-12-04 Two worlds that in academia remain largely separated are brought together in this book in a unique way the world of food safety law and the world of the right to food Key features include 1 an up to date reflection of the status quo on food law related research written by those who are at the forefront of research in the functional field of food law 2 a collection of contributions from all continents of the world and 3 covering human rights international law European law and non European law dimensions This book is written as a Liber Amicorum in honour of Professor Bernd van der Meulen who was the Chair of Law and Governance at Wageningen University 2001 2018 and established food law as an academic discipline in the Netherlands In 29 contributions the functional field of food law is discussed The contributors are researchers and academics from around the globe and are above all friends who have worked with Bernd during his time at Wageningen University In this book they share their latest insights research and thoughts on this fascinating and highly relevant field

A Critical Mind Christine Godt, Matthias Lamping, 2023-06-22 This book traces the academic footprint of Hanns Ullrich Thirty contributions revolve around five central topics of his oeuvre the European legal order competition law intellectual property the regulation of new technologies and the global market order Acknowledging him as a trailblazer the book aims to capture how deeply Hanns Ullrich has influenced contemporaries and subsequent generations of scholars The contributors reiterate the path breaking patterns of his teachings such as his contemplation of intellectual property as embedded in competition the necessity of balancing private and public interests in intellectual property law the policies of market integration and the peculiar relationship of technological advancement and protectionism

Netherlands Reports to the XIth International Congress of Comparative Law Caracas 1982 H. D'Oliveira, 2013-11-11 Last year I addressed the Netherlands Comparative Law Association with the following question Does Comparative Law Exist At All My intention then was to flog the dead horse of the merger of comparative law and the sociology of law In presenting this voluminous collection of Netherlands national reports to the eleventh congress of the International Academy of Comparative Law I feel my misgivings giving way to the suspicion that comparative law indeed exists Of course national reports do not as such prove the existence of comparative law It is the general reports together with the national reports which embody the comparative effort That is why the Netherlands Comparative Law Association took the initiative to propose the publishing of the materials on a subject to subject basis instead of publishing collections of national reports From a comparative legal point of view it is the topic that should form the basis of the publication and not the origin of the materials The general reporter for each topic should be prepared to take up the responsibilities of editing the volume and would have to be given the right to select those national reports which he considers to be useful both in regard to their quality and the relevance of the material to the basic problems in the questionnaire This proposal met with very favourable comments from the national committees and general

reporters of some fifteen countries *European Trademark Law* Tobias Cohen Jehoram, Constant Van Nispen, 2010-09-30
European Trademark Law describes all relevant developments in both legislation and case law in particular of the Court of Justice offering not only a succinct introduction to the theory structure and nature of trademark law but also insightful suggestions for resolving and answering a host of practical problems As the authors note their book provides an overview of trademark law rather than an overview of trademark legislation The authors view the law from different perspectives they take both the European perspective and the perspective from harmonised national trademark law in particular as it is in the Benelux countries Paying particular attention to the implications of the considerable stream of case law that has followed from partially new doctrines set in place by the harmonization process the book greatly clarifies the workings and interrelations of such factors as the following situations that did not constitute infringement under former trademark law but do constitute infringement today and vice versa different types of marks and their particularities registration and opposition procedures relevant international treaties requirements for the mark grounds for refusal and invalidity scope of and limitations to trademark protection use of trademarks in comparative advertising referential use of trademarks use of trademarks on the internet exhaustion of rights parallel trade concepts of well known trademarks and trademarks with a reputation procedural aspects of enforcing trademark rights how trademark rights are lost The analysis also covers specific aspects of the trademark right that are related to other legal areas such as property law trade name law the law regarding geographical indications of origin copyright law competition law and product liability An especially valuable part of the book's presentation follows the life of a trademark from filing the application up to and including its cancellation revocation or invalidity **The Legal Protection of Biotechnological Inventions in Europe and in the United States** Geertrui van Overwalle, 1997 This paper was presented during the academic year 1995 1996 for the Generale Bank Chair P facing t p
