Reconsidering Olmec Visual Culture Carolyn E. Tate, 2012-08-24 Recently scholars of Olmec visual culture have identified symbols for umbilical cords bundles and cave wombs as well as a significant number of women portrayed on monuments and as figurines In this groundbreaking study Carolyn Tate demonstrates that these subjects were part of a major emphasis on gestational imagery in Formative Period Mesoamerica In Reconsidering Olmec Visual Culture she identifies the presence of women human embryos and fetuses in monuments and portable objects dating from 1400 to 400 BC and originating throughout much of Mesoamerica This highly original study sheds new light on the prominent roles that women and gestational beings played in Early Formative societies revealing female shamanic practices the generative concepts that motivated caching and bundling and the expression of feminine knowledge in the 260 day cycle and related divinatory and ritual activities Reconsidering Olmec Visual Culture is the first study that situates the unique hollow babies of Formative Mesoamerica within the context of prominent females and the prevalent imagery of gestation and birth It is also the first major art historical study of La Venta and the first to identify Mesoamerica's earliest creation narrative It provides a more nuanced understanding of how later societies including Teotihuacan and West Mexico as well as the Maya either rejected certain Formative Period visual forms rituals social roles and concepts or adopted and transformed them into the enduring themes of Mesoamerican symbol systems

Intermediate Elites in Pre-Columbian States and Empires Christina M. Elson, R. Alan Covey, 2006-02-09

From the Mesoamerican highlands to the Colca Valley in Peru pre Columbian civilizations were bastions of power that have largely been viewed through the lens of rulership or occasionally through bottom up perspectives of resistance Rather than focusing on rulers or peasants this book examines how intermediate elites both men and women helped to develop sustain and resist state policies and institutions Employing new archaeological and ethnohistorical data its contributors trace a 2 000 year trajectory of elite social evolution in the Zapotec Wari Aztec Inka and Maya civilizations This is the first volume to consider how individuals subordinate to imperial rulers helped to shape specific forms of state and imperial organization Taking a broader scope than previous studies it is one of the few works to systematically address these issues in both Mesoamerica and the Central Andes It considers how these individuals influenced the long term development of the largest civilizations of the ancient Americas opening a new window on the role of intermediate elites in the rise and fall of ancient states and empires worldwide The authors demonstrate how such evidence as settlement patterns architecture decorative items and burial patterns reflect the roles of intermediate elites in their respective societies arguing that they were influential actors whose interests were highly significant in shaping the specific forms of state and imperial organization Their emphasis on provincial elites particularly shifts examination of early states away from royal capitals and imperial courts explaining how local elites and royal bureaucrats had significant impact on the development and organization of premodern states Together these papers demonstrate that intricate networks of intermediate elites bound these ancient societies together and that competition between individuals and groups contributed to their decline and eventual collapse By addressing current theoretical concerns with agency resistance to state domination and the co option of local leadership by imperial administrators it offers valuable new insight into the utility of studying intermediate elites
