THE SECOND REPORT ON THE STATE OF THE WORLD'S ANIMAL GENETIC RESOURCES FOR FOOD AND AGRICULTURE Food and Agriculture Organization of the United Nations, 2018-06-06 Animal genetic resource diversity underpins the supply livestock products and services across a wide range of production environments It promotes resilience and serves as a basis for adapting livestock management to changing conditions It is vital to livelihoods of many of the world's poor people It can contribute to the delivery of ecosystem services such as landscape management and the maintenance of wildlife habitats However it is often undervalued underused and under threat This report updates the global assessment provided in the first report on The State of the World's Animal Genetic Resources for Food and Agriculture published in 2007 It focuses particularly on changes that have occurred during the period since the first report was published It serves as a basis for a review and potential update of the Global Plan of Action for Animal Genetic Resources which since 2007 has provided an agreed international framework for the management of livestock biodiversity Drawing on 129 country reports it presents an analysis of the state of livestock diversity the influence of livestock sector trends on the management of animal genetic resources the state of capacity to manage animal genetic resources including legal and policy frameworks and the state of the art in tools and methods for characterization valuation use development and conservation *Ecology, Evolution and Behaviour of Wild Cattle* Mario Melletti, James Burton, 2014-10-30 Covering all thirteen species of wild cattle Ecology Evolution and Behaviour of Wild Cattle brings together the contributions of international leading experts on the biology evolution conservation status and management of the tribe Bovini providing A comprehensive review of current knowledge on systematic anatomy and ecology of all wild cattle species chapters 1 to 8 A clear understanding of the conservation status of each species and the gaps in our current knowledge chapters 9 to 20 A number of case studies on conservation activities and an investigation of some of the most threatened and poorly understood species chapters 21 to 27 An invaluable resource for students researchers and professionals in behavioural ecology evolutionary biology and conservation biology this beautifully illustrated reference work reveals the extraordinary link between wild cattle and humans the benefits some of these species have brought us and their key roles in their natural ecosystems **Indian Ocean In Antiquity** Julian Reade, 2013-10-28 The beaches of the Indian Ocean stretch in a golden arc from the Atlantic to the Pacific delimiting the entire southern boundary of the old world On the lands adjoining this ocean and its inlets almost every variety of human adaptation is or has been represented as have the interactions between them Societies of fisherman and pirates hunters and gatherers herdsman and agrarian farmers states and urban civilizations based on farming or trade have all flourished at one time or another Yet studies of the systems of the Indian Ocean before the spread of Islam remain in their infancy and until now the record on early Indian Ocean civilizations has been fragmented The Indian Ocean in Antiquity brings together an international group of leading scholars to present for the first time a comprehensive view of the current state of research on

the early populations of the area After an introductory chapter the twenty six papers are grouped into four sections The Environment and Natural Resources The Early Civilizations The Classical Period and Between Africa and China They comprise the most far reaching look at this vast region in pre modern times that has ever been available This pioneering volume makes an important contribution to the understanding of a region of great significance in world history both past and future Topics include sea levels and other factors affecting coastal settlement contracts between Mesopotamia and the Indus Achaemenid Parthian and Sasanian maritime activity Roman interests in the Red Sea and the Indian Ocean the archeological evidence for early trade between South and Southeast Asia the early settlement of Madagascar the ethnographic evidence for long distance contacts between Oceania and East Africa and recent discoveries of Christian and Hindu remains in Quanzhou

Animalia Antoinette Burton, Renisa Mawani, 2020-10-09 From yaks and vultures to whales and platypuses animals have played central roles in the history of British imperial control The contributors to *Animalia* analyze twenty six animals domestic feral predatory and mythical whose relationship to imperial authorities and settler colonists reveals how the presumed racial supremacy of Europeans underwrote the history of Western imperialism Victorian imperial authorities adventurers and colonists used animals as companions military transportation agricultural laborers food sources and status symbols They also overhunted and destroyed ecosystems laying the groundwork for what has come to be known as climate change At the same time animals such as lions tigers and mosquitoes interfered in the empire's racial gendered and political aspirations by challenging the imperial project's sense of inevitability Unconventional and innovative in form and approach *Animalia* invites new ways to consider the consequences of imperial power by demonstrating how the politics of empire in its racial gendered and sexualized forms played out in multispecies relations across jurisdictions under British imperial control Contributors Neel Ahuja Tony Ballantyne Antoinette Burton Utathya Chattopadhyaya Jonathan Goldberg Hiller Peter Hansen Isabel Hofmeyr Anna Jacobs Daniel Heath Justice Dane Kennedy Jagjeet Lally Krista Maglen Amy E Martin Renisa Mawani Heidi J Nast Michael A Osborne Harriet Ritvo George Robb Jonathan Saha Sandra Swart Angela Thompsell

Cattle Breeds of the World Marleen Felijs, 2024-12-02 The origin and evolution of cattle breeds was long explained only by historical sources with questionable reliability In recent years genetic and molecular data have become available that shed new light on this revealing how from neolithic times breeds emerged by migratory movements and mutual influencing of gene pools But while molecular breed characterization is now rapidly advancing phenotypic characterization remains under explored This publication presents a classification of around 1 000 cattle breeds based on geographical and historical data and morphology Males and females of every breed are portrayed by the author in water colour and to scale The illustrations are positioned next to each breed's description completing the overall image
