Zen Physics David Darling, 2012-08 Acclaimed astrophysicist David Darling comes well armed with both science and mysticism to provide a theory of consciousness and its final conclusion The science of death and the logic of reincarnation give pause to our current thinking process Yet after reading this book you can nod our head in understanding and move on more mature perhaps in knowing we do live on in some sense Just not in the way we most wished for *Life as We Know It* Joseph Seckbach, 2006-09-21 Life As we Know It LAKI covers several aspects of Life ranging from the prebiotic level origin of life evolution of prokaryotes to eukaryotes and finally to various affairs of human beings Although it is hard to define Life one can however characterize it and describe its features Topics treated are categories of bacteria algae and fungi conscience philosophy theology aesthetics appearance of sport and life destiny life after clinical death and thoughts of the world to come Olam Haba The various chapters have been written so that they are accessible to all from the avid lay reader to the specialist and make available multidisciplinary sources of information about Life The information presented here on the various phenomena of Life were all written by highly qualified authors including scientists public leaders a professional athlete and three Nobel Laureates The Psychology of Spirit Mary Devlin, 2000-12-20 A book on the psychology of the soul blending modern transpersonal psychology ancient myth and years of experience with past life regression The Psychology of Spirit presents the results of over 20 years of study of esoteric philosophy psychology world mythology and religions reincarnation and past life regression all coming together in a new psychological paradigm for the purpose of clearing the soul rather than the personality of ancient trauma and enabling the transition to enlightenment The Reincarnationist M. J. Rose, 2015-06-15 Book one of The Reincarnationist series A bomb in Rome a flash of bluish white and photojournalist Josh Ryder's world explodes As Josh recovers thoughts that have the emotion the intensity the intimacy of memories invade him But they are not his They are ancient and violent with an urgency he cannot ignore pulling him to save Sabina and the treasures she protects But who is Sabina Desperate for answers Josh turns to the Phoenix Foundation a research facility that scientifically documents past life experiences He is led to an archaeological dig and to Professor Gabriella Chase who has discovered an ancient powerful secret that threatens to merge the past with the present Here the dead call out to the living and murders of the past become murders of the present Previously published Zen Physics David J. Willis, 2014-04-01 Many Americans say they are uncertain about their religious beliefs although they continue to attend Christian and other churches Interdenominational minister Willis presents this beautifully written book to help questioners maintain their integrity while relating to the vast Mystery that informs the universe beyond all understanding We know we don't know Willis says and yet we all even atheists must

stand on assumptions that help us lead good lives To explore these assumptions he discusses different ways of thinking about God scientific and mythical views the sources of good and evil and the need for both freedom and commitment He assures us we can all think reasonably about Ultimate Reality and find a faith that fits The book grew from theology classes Willis taught in Unitarian churches and universities and from conversations with discontented members of other discussion groups His clear and engaging prose is full of lively exchanges with his students Frequent references to the best contemporary theologians Bishop Spong for example and to philosophers physicists mythologists and Bible experts provide an inspiring resource for those who long to resolve the conflict between faith and reason doubt and belief Soul Theft Bill
