The Globalization of Political Violence Richard Devetak,Christopher W. Hughes,2007-12-18 The events of the 11th of September 2001 revealed most dramatically that globalization has a shadow While large sections of the world s population enjoy the perceived benefits of globalization others seek to utilize globalization for their own politically violent purposes If 9 11 demonstrated anything it is that globalization can as readily facilitate violence and insecurity as it can produce stability prosperity and political order This edited volume offers important new methodological and multi disciplinary insights into the study of globalization and political violence It brings together studies from various disciplines in order to address the precise nature of the relationship between globalization and political violence as it seeks to offer new theoretical and empirical understandings of the types of

Globalization, the State, and Violence

Jonathan Friedman,2004-09-08 Friedman and a distinguished group of contributors offer a compelling analysis of globalization and the lethal explosiveness that characterizes the current world order In particular they investigate global processes and political forces that determine networks of crime commerce and terror and reveal the economic social and cultural fragmentation of transnational networks In a critical introduction Friedman evaluates how transnational capital represents a truly global force but geographical decentralization of accumulation still leads to declining state hegemony in some areas and increasing hegemony in others The authors examine the growth and increasing autonomy of indigenous populations and the massively destabilizing effect of migration processes They describe the rapid increase in criminalization of ethnic and immigrant groups as well as an increase in class stratification creating new forms of social confrontation and violence In addition to ethnic identity based conflict there are analyses of transnational criminal networks which also represents disintegration of larger homogeneous territories or hierarchical orders The authors ask us to reevaluate the dynamics of globalization the contradictions of centralization and fragmentation around the world as we discover how best to transform these conditions for the future This research was originally funded by the Harry Frank Guggenheim Foundation Globalization the State and Violence will be a valuable reference in anthropology social theory international politics and economics ethnic conflict immigration and economic history

The Globalization Paradox

Dani Rodrik,2011 Combining history with personal insights a professor of International Political Economy at Harvard University discusses how democracy and national self determination cannot be simultaneously pursued with economic globalization and instead promotes customizable globalization with international rules to achieve balanced prosperity

The Global Society and Its Enemies

Ludger Kühnhardt,2017-06-01 This book discusses contemporary constellations of international politics and global transformation It offers guidance on how to conceptualize the complexity of current global changes and practical policy advice in order to promote an open global society In the light of today s challenges the author re interprets the main argument of the philosopher Karl Popper in The Open Society and Its Enemies Based on this framework and new empirical evidence the book discusses the thesis of an ongoing Third World War triggered by fundamental deficits in nation building occurring primarily within states and not between them and accelerated by asymmetric forms of warfare and Islamist totalitarianism The book also explores various threats to the global order such as the paradox of borders as barriers and

bridges the global effects of the youth bubble in many developing countries and the misuse of religious interpretation for the use of political violence Lastly the author identifies advocates and supporters of a liberal multilateral and open order and argues for a reinvention of the Western world to contribute to a revival of a liberal global order based on mutual respect and joint leadership

Making War on the World Mark Shirk, 2022-03-01 The state bounds politics it constructs and enforces boundaries that separate what it controls from what lies outside its domain However states face a variety of threats that cross and challenge their geographical and conceptual boundaries Transnational violent actors that transcend these boundaries also defy the state's claims to political authority and legitimacy Mark Shirk examines historical and contemporary state responses to transnational violence to develop a new account of the making of global orders He considers a series of crises that plagued the state system in different eras golden age piracy in the eighteenth century anarchist propagandists of the deed at the turn of the twentieth and al Qaeda in recent years Shirk argues that states redraw conceptual boundaries such as between international and domestic to make sense of and defeat transnational threats In response to forms of political violence that challenged boundaries states developed creative responses that included new forms of control surveillance and rights As a result these responses gradually made and transformed the state and global order Shirk draws on extensive archival research and interviews with policy makers and experts and he explores the implications for understandings of state formation Combining rich detail and theoretical insight Making War on the World reveals the role of pirates anarchists and terrorists in shaping global order
