The Rowman & Littlefield Handbook of Bioethics Ezio Di Nucci, Ji-Young Lee, Isaac A. Wagner, 2022-10-17 This bioethics handbook offers concise up to date and easy to read chapters on a broad range of bioethical topics in the following categories foundational concepts theory and method healthcare ethics research ethics public health technology and the environment The volume provides a snapshot of current bioethics taking into account current affairs and emerging new topics Each chapter acknowledges and critically breaks down the historical developments of the subject and the most authoritative existing literature on respective topics providing accessible and up to date philosophical analysis As such the chapters are designed to be attractive as primary or supplementary teaching material for university classes of the philosophical or bioethical variety with clear demarcations and indicators for key terms ideas and arguments that should also facilitate productive note taking and points for critical discussion for students The handbook also serves as a one stop starting resource for multi and interdisciplinary researchers and practitioners who engage with bioethics in their work

Elemental Difference and the Climate of the Body Emily Anne Parker, 2021-06-17 Political hierarchies and ecological crises are often considered to be two different problems For example many speak in the present of parallel concerns climate change and racial injustice Emily Anne Parker argues rather that these concerns share a common cause in the polis Polis is an ancient Greek term for the city state from which the English term political derives But polis is more than a term It is a philosophy according to which there is one complete human body and that body is meant to govern all other things In that sense there are not two concerns but instead one concern to perceive the ways in which this tradition of the polis constrains the present Emily Anne Parker bridges the insights of social constructionism and new materialisms to create a philosophy of elemental difference Difference rather than needing to be either dismissed based on its social construction or reified in keeping with the hierarchies of the polis is crucial for addressing contemporary crises of the polis

Research Handbook on Liberalism Duncan Ivison, 2024-05-02 This timely Research Handbook reckons with the past present and future of liberalism at a time when anxieties are being expressed about its viability Duncan Ivison brings together a broad and international range of leading experts to explore the complexities of liberalism examining the extent to which it can address rising challenges from illiberalism to inequality

Our Faithfulness to the Past Sue Campbell, 2014 This volume brings together essays three of them previously unpublished on the epistemology ethics and politics of memory by the late feminist philosopher Sue Campbell The essays in Part I diagnose contemporary skepticism about personal memory and develop an account of good remembering that is better suited to contemporary reconstructive theories of memory Campbell argues that being faithful to

the past requires both accuracy and integrity and is both an epistemic and an ethical achievement The essays in Part II focus on the activities and practices through which we explore and negotiate the shared significance of our different recollections of the past and the importance of sharing memory for constituting our identities Views about self identity relation and responsibility all influenced by traditions in feminist philosophy are examined through the lens of Campbell s relational conception of memory She argues that remaining faithful to our past sometimes requires us to re negotiate the boundaries between ourselves and the collectives to which we belong In Part III Campbell uses her relational theory of memory to address the challenges of sharing memory and renewing selves in contexts that are fractured by moral and political difference especially those arising from a history of injustice and oppression She engages in detail Canada s Indian Residential Schools Truth and Reconciliation Commission where survivor memories have the potential to illuminate the significance of the past for a shared future The study of memory brings together philosophers psychologists historians anthropologists legal theorists and political theorists and activists Sue Campbell demonstrates a singular ability to put these many different areas of scholarship and activism into fruitful conversation with each other while also adding an original and powerful voice to the discussion

Moral Equality, Bioethics, and the Child Claudia Wiesemann, 2016-08-18 Presenting real life cases from clinical practice this book claims that children can be conceived of as moral equals without ignoring the fact that they still are children and in need of strong family relationships Drawing upon recent advances in childhood studies and its key feature the agentic child it uncovers the ideology of adultism which has seeped into much what has been written about childhood ethics However this book also critically examines those positions that do accord moral equality to children but on grounds not strong enough to support their claim It lays the groundwork for a theory of moral equality by assessing the concepts of parenthood family best interest paternalism and above all autonomy and trust which are so important in envisioning what we owe the child It does not only show how children like adults should be considered moral agents from infancy but also how ethical theories addressing adults can significantly profit from recognizing this The analysis takes into account contributions from European as well as American scholars and makes use of a wide range of ethical psychological cultural and social scientific research

The Global and Social Consequences of the COVID-19 Pandemic Gottfried Schweiger, 2022-06-30 This book directly addresses the social and economic consequences of the COVID 19 pandemic It does so by focusing on both the immediate effects during the pandemic and the lockdowns as well as the issues related to the long term social consequences that are likely to result from the economic crisis in the coming years To date most philosophical essays and books have focused on the health aspects of the pandemic and in particular on the fields of medical ethics and public health ethics Containing a truly international and interdisciplinary group of scholars a unique and global perspective is offered on the rarely discussed social and economic consequences of the pandemic This book is of great interest to academic philosophers but also to researchers from the social sciences

Disability in Practice Adam Cureton, Thomas E. Hill

Jr.,2018-07-18 Everyone is disabled in some respect at least in the sense that others can do things that we cannot But significant limitations on pursuing major life activities due to severely limited eyesight hearing mobility cognitive functioning and so on pose special problems that fortunately have been recognized to some extent in our public policies Public policy is important as are the deliberative frameworks that we use to justify them and the essays in the second and third sections of this volume have significant implications for public policy and offer new proposals for justifying frameworks Underlying public policies and their assessment however are the attitudes good and bad that we bring to them and our attitudes as well deeply affect our interpersonal relationships The essays here especially in the first section reveal how complex and problematic our attitudes towards persons with disabilities are when we are in relationships with them as care givers friends family members or briefly encountered strangers Our attitudes towards ourselves as persons with or without disabilities are implicated in these discussions as well Among the special highlights of this volume are its focus on moral attitudes and relationships involving disabilities and its contributors recognition of the multi faceted nature of disability problems The importance of respect for persons as a necessary complement to beneficence is an underlying theme and a deeper understanding of respect is made possible by considering closely its implications for relationships with persons with disabilities Awareness of the common and uncommon human vulnerabilities also makes clear the need for modifying traditional deliberative frameworks for assessing policies and several essays make constructive proposals for the changes that are needed

Methodological Advances in Research on Emotion and Education Michalinos Zembylas,Paul A. Schutz,2016-03-10 This volume presents different conceptual and theoretical frameworks as well as research methods that have helped educational researchers to study emotions It includes innovative approaches that push the methodological boundaries that have served educational researchers until now and proposes new ways of researching emotions in educational contexts In particular this edited volume provides a historical frame for studying emotions It connects theoretical epistemological views with choice of research methods and describes specific methods helpful in doing research on emotions as they are grounded in different theoretical and disciplinary traditions such as psychology philosophy sociology history political science cultural studies and feminist studies Finally it appreciates the contextual and international dimensions of studying emotions in education and contributes to ongoing debates about the implications of our methodological choices for understanding emotion in education This combination of variety timeliness potential for transformation of the field and uniqueness make this a very valuable resource to introduce new scholars in the field alongside established scholars
