Wired to Care: How Companies Prosper When They Create Widespread Empathy Dev Patnaik,2009 *Wired to Care* Dev Patnaik,2009-01-09 In this essential and illuminating book top business strategist Dev Patnaik tells the story of how organizations of all kinds prosper when they tap into a power each of us already has empathy the ability to reach outside of ourselves and connect with other people When people inside a company develop a shared sense of what s going on in the world they see new opportunities faster than their competitors They have the courage to take a risk on something new And they have the gut level certitude to stick with an idea that doesn t take off right away People are Wired to Care and many of the world s best organizations are too In pursuit of this idea Patnaik takes readers inside big companies like IBM Target and Intel to see widespread empathy in action But he also goes to farmers markets and a conference on world religions He dives deep into the catacombs of the human brain to find the biological sources of empathy And he spends time on both sides of the political aisle with James Carville the Ragin Cajun and John McCain a national hero to show how empathy can give you the acuity to cut through a morass of contradictory information *Wired to Care* is a compelling tale of the power that people have to see the world through each other s eyes told with passion for the possibilities that lie ahead if leaders learn to stop worrying about their own problems and start caring about the world around them As Patnaik notes in addition to its considerable economic benefits increasing empathy for the people you serve can have a personal impact as well It just might help you to have a better day at work

Rathbun,2021-07-04 Most everyone on the planet is aware of the word empathy but what is it Empathy is experienced in two basic forms instinctual and innate The most common form of empathy is instinctual It is based in self preservation and the

need of the individual is more important than the need of others Everyone has this form within them Another form of empathy is innate This form of empathy is based in an innate feeling of care for others These two forms of empathetic care determine how we treat others and our self Instinctual empathy cares more about oneself before others This manifests as disharmony with others and becomes problematic for society This is the basis of selfishness If a person has innate empathy they tend to be caring but care at their own expense They feel the pain of others and another s pain often becomes theirs too This causes the individual to feel disharmonious within oneself There is a way to solve both kinds of empathetic disharmony Empathy is a connective energy It does not tell you how you connect with yourself or others you do with the depths of your being or you do not This book will teach you how to be in harmony with the essence of your empathy
