Flash MX is the most powerful and widely used client software for the Web, and it's the only one that runs on virtually every browser on every platform. As such, it is the ideal platform for sophisticated Web applications, especially when paired with XML. Sophisticated applications demand a solid understanding of object-oriented programming techniques, regardless of the language and platform used. This may be the only Flash book entirely devoted to object-oriented programming. This book is for readers who want to do more than load and publish the pre-built Flash MX templates; who want to make sure their work is reusable; who want to learn solid programming techniques; and above all, who want to build the next generation of Web-based applications. By the time readers finish *Object Oriented Macromedia Flash MX*, readers will be able to develop highly reusable applications and services that leverage the dynamic features in Flash MX ActionScript. **MSDN Magazine**, 2001
