Wolves On The Hunt The Behavior Of Wolves Hunting Wild Prey:

Wolves on the Hunt L. David Mech, Douglas W. Smith, Daniel R. MacNulty, 2015-05-22 The wolf is an adept killer able to take down prey much larger than itself While adapted to hunt primarily hoofed animals a wolf or especially a pack of wolves can kill individuals of just about any species Combining behavioral data thousands of hours of original field observations research in the literature a wealth of illustrations and in the e book edition and online video segments from cinematographer Robert K Landis the authors create a compelling and complex picture of these hunters **WOLVES! Strange and**

Wonderful Laurence Pringle, 2022-11-22 Learn all about wolves with this newest title in the acclaimed Strange and Wonderful series featuring careful research and exquisite illustrations This nonfiction book takes young readers on a journey into the lives of wolves the largest of all wild mammals who have lived in the Northern Hemisphere for millions of years Kids will learn how wolves use their powerful jaw muscles and sharp teeth to hunt their prey how a wolf pack forms and the meaning of different wolf howls This book explores every aspect of these fascinating canines and even corrects erroneous myths and lore about them **The Last Stand of the Pack** Arthur Carhart, 2017-12-01 This critical edition explores the

past and future of wolves in Colorado Originally published in 1929 The Last Stand of the Pack is a historical account of the extermination of what were then believed to be the last wolves in Colorado Arthur H Carhart and Stanley P Young describe the wolves extermination and extoll the bravery of the federal trappers hunting them down while simultaneously characterizing the wolves as cunning individuals and noble adversaries to the growth of the livestock industry and the settlement of the West This is nature writing at its best even if the worldview expressed is at times jarring to the twenty first century reader Now almost 100 years later much has been learned about ecology and the role of top tier predators within ecosystems In this new edition Carhart and Young s original text is accompanied by an extensive introduction with biographical details on Arthur Carhart and an overview of the history of wolf eradication in the west chapters by prominent wildlife biologists environmentalists wolf reintroduction activists and ranchers Tom Compton Bonnie Brown Mike Phillips Norman A Bishop and Cheney Gardner and an epilogue considering current issues surrounding the reintroduction of wolves in Colorado Presenting a balanced perspective these additional chapters address views both in support of and opposed to wolf reintroduction Coloradans are deeply interested in wilderness and the debate surrounding wolf reintroduction but for wolves to have a future in Colorado we must first understand the past The Last Stand of the Pack Critical Edition presents both important historical scholarship and contemporary ecological ideas offering a complete picture of the impact of wolves in Colorado **Cattle, Their Predators and Geomatics Research** Michael O'Neal Campbell, 2025-08-06 Cattle are

currently the most important domesticated mammals with populations numbering in the hundreds of millions and occupying large tracts of land while the conservation of large mammalian carnivores is becoming a dominant discourse in modern geopolitics also claiming large portions of the Earth s land surface Computer based surveying and communication systems

including geomatics Big Data and Big Tech are becoming an essential part of human communication and environmental assessments and are critical to large scale assessments of land conflicts A current critical potent but neglected issue concerns the measurement of the interfaces of large carnivore and cattle ecologies in a cross continental format This book offers a novel approach to the interfaces of the sciences of conservation biology animal ecology agricultural development and geomatics which are increasingly interconnected in modern global development scenarios For animal ecology and conservation biology it is about the management systems that have developed from ecological and human parameters For agricultural development topics concern ancestral development physiological characteristics ecological requirements and predation opportunities and conflicts of cattle breeds For geomatics the topics concern the image based and survey based technologies that enable more critical environmental assessments The book takes a novel approach by examining the ancestry of cattle including the aurochs and current wild buffalos gaur banteng yaks bison the process of domestication into taurine and indicine cattle the semi domestication of yaks and water buffalo the ecologies of ancestral and modern large carnivores including bears big cats and canids and how the requirements of these large charismatic mammals conflict with the requirements of cattle and agricultural development in Asia Europe Africa North America and South America This integrative approach contributes to the interests of academic researchers students practitioners and policy makers and general readers

Wikenros, Stotra Chakrabarti, Yadvendradev V. Jhala, 2023-05-12 **Owned, An Ethological Jurisprudence of Property**

Johanna Gibson, 2019-12-06 This book draws upon domestication science to undertake a radical reappraisal of the jurisprudence of property and intellectual property Bringing together animal studies and legal philosophy it articulates a critique of dominant property models and relationships from the perspective of cognitive ethology domestication science and animal behaviour In doing so a radical new picture of property emerges Focusing on the emergence of property models through prevailing ideas of human domestication and settlement the book challenges the anthropocentrism that informs standard approaches to ownership and to authorship Utilising a wide range of examples from ethology and animal studies the book thus rethinks the very nature of property as uniquely human This highly original contribution to the fields of property and intellectual property will appeal not only to legal scholars in these areas as well as in animal law but also to legal theorists and others working in the social sciences with interests in posthumanism and animal studies *Wolf* L. Mech, 2012-05-16 Throughout the continents of Eurasia and North America primitive man evolved in association with wolves Wolves competed with him as a hunter and raided his flocks and herds Inevitably folklore became rich in tales of this powerful resourceful creature Europeans reached North America with their attitudes already formed The wilderness pressed in upon their tiny settlements in constant threat and all energies were devoted to destroying it and turning its inexhaustible resources to use Over vast areas of the continent the wolf went down with the wilderness before the unprecedented effectiveness of our technological attack on the ecology of a continent Today however there is a great tide of concern over the consequences of our assault on the wild lands and wild creatures on the continent and more and more biologists are devoting their knowledge and energy to searching studies of our land and its native biota The wolf has been the subject of detailed study by a number of ecologists on this continent who make use of all the research devices now available Much of our knowledge is very recent is increasing rapidly and has resulted from the work of a mere handful of keen resourceful and courageous students of wolf biology This the first book to attempt a complete account of the biology of the wolf draws from years of field research and upon the rich literature from two continents From the foreword by Ian McTaggart Cowan *The Knowledge Book* National Geographic, 2009 Indispensable for every home library and office this handbook distills thousands of years of humankind's most significant ideas and achievements explains how they are linked and packs everything into a single irresistibly readable volume Illustrations **Field Museum of Natural History**
