Your Home Technical Manual:

Green Australia Steve Lancaster, 2012 Green Australia A snapshot examines the ways in which Australians are attempting to reduce their ecological footprint both at home and at work In 2009 the CO2 Energy Emissions Index found that Australia had overtaken the USA to become the largest per capita emitter of greenhouse gases in the world a legacy of dependence on coal fired power stations the widespread adoption of conventional farming techniques heavy reliance on vehicles powered by fossil fuel dirty industrial practices and a growing mountain of waste Yet in recent years there has been a growing awareness that climate change is beginning to bite the recent drought and devastating floods suggesting that more extreme weather patterns are likely unless significant steps are taken to combat global warming Using case studies and up to date research this book demonstrates that although much more needs to be done if Australia is to secure a carbon neutral future some Green shoots are beginning to emerge

Your Home, 2010 Reinventing Fire Amory Lovins, 2013-09-11 Oil and coal have built our civilisation created our wealth and enriched the lives of billions Yet their rising costs to our security economy health and environment are starting to outweigh their benefits Moreover the tipping point where alternatives work better and compete purely on cost is not decades in the future it is here and now And that tipping point has become the fulcrum of economic transformation In *Reinventing Fire* Amory Lovins and the Rocky Mountain Institute offer a new vision to revitalise business models and win the clean energy race not forced by public policy but led by business for long term advantage This independent and rigorous account offers market based solutions integrating transportation buildings industry and electricity It maps pathways for running a 158% bigger US economy in 2050 but needing no oil no coal no nuclear energy one third less natural gas and no new inventions This transition would cost 5 trillion less than business as usual without counting fossil fuels huge hidden costs Whether you care most about profits and jobs or national security or environmental stewardship climate and health *Reinventing Fire* makes sense It s a story of astounding opportunities for creating the new energy era
