Children, Childhoods and Global Politics J. Child Soldiers as Agents of War and Peace Leonie Steinl, 2017-08-19 This book deals with child soldiers involvement in crimes under international law Child soldiers are often victims of grave human rights abuses and yet in some cases they also participate actively in inflicting violence upon others Nonetheless the international discourse on child soldiers often tends to ignore the latter dimension of children's involvement in armed conflict and instead focuses exclusively on their role as victims While it might seem as though the discourse is therefore beneficial for child soldiers as it protects them from blame and responsibility it is important to realize that the so called passive victim narrative entails various adverse consequences which can hinder the successful reintegration of child soldiers into their families communities and societies This book aims to address this dilemma First the available options for dealing with child soldiers participation in crimes under international law such as transitional justice and criminal justice and their shortcomings are analyzed in depth Subsequently a new approach is developed towards achieving accountability in a child adequate way which is called restorative transitional justice This book is in the first place aimed at researchers with an interest in child soldiers children and armed conflict as well as international criminal law transitional justice juvenile justice restorative justice children's rights and international human rights law Secondly professionals working on issues of transitional justice juvenile justice international criminal law children's rights and the reintegration of child soldiers will also find the subject matter of great relevance to their practice Dr Leonie Steinl LL.M. Global Insecurity Anthony Burke, Rita Parker, 2017-03-23 This innovative volume gathers some of the world's best scholars to analyse the world's collective international efforts to address globalised threats through global security governance Addressing global and planetary forms of insecurity that include nuclear weapons conventional arms gender violence climate change disease bio weapons cyber conflict children in conflict crimes against humanity and refugees this timely book critiques how they are addressed by global institutions and regimes and advocates important

conceptual institutional and policy reforms This is an invaluable resource for students scholars and policymakers in international health security and development Feminist Peace Research Élise Féron, Tarja Väyrynen, 2024-04-09 This textbook provides a comprehensive overview of the field of gender feminism and peace It is based on the argument that feminist thinking is necessary to understand and analyse the core issues in peace and conflict studies and is fundamental to thinking about solutions to global problems and to promoting peaceful conflict transformation The book centres alternative and critical approaches missing in mainstream peace research and brings forward feminist perspectives on traditional peace research topics such as militarism peacekeeping arms trade and the articulation of different forms of violence It also advances critical and alternative issues and topics that traditional peace research has sidelined including for example artificial intelligence technologies and peace trauma and memory human non human species relations art popular culture post colonial and decolonial feminist perspectives and the queering of war and peace In sum this textbook contributes to the visibility of these feminist critical approaches to peace research and makes them accessible to scholars and students interested in the subject This book will be of much interest to students of peace studies feminist theory gender studies and International Relations *The Interaction Between Local and International Peacebuilding Actors* Sara Hellmüller, 2017-12-22 This book helps to better understand how the interaction between local and international peacebuilding actors influences the outcomes of their programs Based on the case study of Ituri in the Democratic Republic of Congo it analyses the relationships between local and international peacebuilding actors over the long term and assesses ways to overcome the obstacles to more cooperative partnerships Focusing on perceptions the book nuances existing definitions of war peacebuilding and peace and allows for a more comprehensive understanding of conflict contexts Thereby it contributes to the literature on peacebuilding effectiveness and makes concrete suggestions for translating these findings into practice **Youth Identity, Politics and Change in Contemporary Kurdistan** Shivan Fazil, Bahar Baser, 2021-09-01 Today's youth are challenging the older political class around the world and are forming new political generations Examples from South Africa and elsewhere where peace processes were deemed to be successful show signs of youth disapproval of the current post conflict conditions Moreover the Arab Spring witnessed numerous youth movements emerge in authoritarian and illiberal contexts This book was prepared in light of these discussions and aims to contribute to these ongoing debates on youth politics by presenting the situation of youth in the Kurdistan Region of Iraq KRI as a case study It will be the first book that specifically focuses on the Iraqi Kurdish youth and their political social and economic participation in Kurdistan The contemporary history of the KRI is marked by conflict war and ethnic cleansing under Saddam Hussein and the tyranny of the Ba'ath regime significantly affecting the political situation of the Kurds in the Middle East Most of the recent academic literature has focused on the broader picture or in other words the macro politics of the Kurdish conundrum within Iraq and beyond There is little scholarship about the Kurdish population and their socio economic conditions after 2003 and almost

none about the younger generation of Kurds who came of age during autonomous Kurdish rule This is a generation that unlike their forebears has no direct memory of the decades long campaigns of repression Studying and examining the rise of this generation of Kurdish young millennials Generation 2000 who came of age in the aftermath of the United States invasion of Iraq offers a unique approach to understand the dynamics in a region that underwent a substantial socio political transformation after 2003 as well as the impact of these developments on the youth population Pursuing different themes and lines of inquiry the contributors of the book analyze the challenges and opportunities for young men and women to fulfil their needs and desires and contribute to the ongoing quest for nationhood and nation building In this book our aim is to bring together a variety of perspectives from local and foreign academics who have been working on pressing issues in Kurdistan and beyond The chapters focus on an array of themes particularly including political participation political situation and change religiosity and extremism Taken together the chapters provide us with an introduction to youth politics in Kurdistan This book is just the first attempt to open academic and nonacademic debate on this subject at a time when protests around youth related issues are becoming a more prevalent method of political engagement in the region Our hope is that more research follows and supplements what has not been addressed in this book especially through the introduction of first hand youth perspectives to the core of this analysis and giving them a voice in nonviolent platforms

Childhood and the Production of Security J Marshall Beier, 2018-02-02 Responding to security scholars puzzling dearth of attention to children and childhoods the contributors to this volume reveal the ways in which they not only are already present in security discourses but are actually indispensable to them and to the political projects they make possible From zones of conflict to everyday life contexts in the post industrial Global North dominant ideas about childhood work to regulate the constitution of political subjects whilst variously enabling and foreclosing a wide range of political possibilities Whether on the battlefields of Syria in the halls of the UN or the conceptual musings of disciplinary Security Studies claims about or ostensibly on behalf of children are ubiquitous Recognizing children as engaged political subjects however challenges us to bring a sustained critical gaze to the discursive and semiotic deployments of children and childhood in projects not of their making as well as to the ways in which power circulates through and around them This book was originally published as a special issue of Critical Studies on Security
