Verification Kousha Etessami, Sriram K. Rajamani, 2005-08-25 This volume contains the proceedings of the International Conference on Computer Aided Verification CAV held in Edinburgh Scotland July 6 10 2005 CAV 2005 was the seventeenth in a series of conferences dedicated to the advancement of the theory and practice of computer assisted formal analysis methods for software and hardware systems The conference covered the spectrum from theoretical results to concrete applications

with an emphasis on practical verification tools and the algorithms and techniques that are needed for their implementation. We received 123 submissions for regular papers and 32 submissions for tool papers. Of these submissions, the Program Committee selected 32 regular papers and 16 tool papers which formed the technical program of the conference. The conference had three invited talks by Bob Bentley (Intel), Bud Mishra (NYU) and George C. Necula (UC Berkeley). The conference was preceded by a tutorial day with two tutorials: Automated Abstraction Refinement by Thomas Ball (Microsoft) and Ken McMillan (Cadence) and Theory and Practice of Decision Procedures for Combinations of First Order Theories by Clark Barrett (NYU) and Cesare Tinelli (University of Iowa). CAV 2005 had six associated workshops: BMC 2005 3rd Int Workshop on Bounded Model Checking, FATES 2005 5th Workshop on Formal Approaches to Testing Software, GDV 2005 2nd Workshop on Games in Design and Verification, PDPAR 2005 3rd Workshop on Pragmatics of Decision Procedures in Automated Reasoning, RV 2005 5th Workshop on Runtime Verification and SoftMC 2005 3rd Workshop on Software Model Checking.

Formal Methods and Software Engineering Karin Breitman, Ana Cavalcanti, 2009-11-18 Formal methods for development of computer systems have been extensively studied over the years. A range of semantic theories, specification languages, design techniques and verification methods and tools have been developed and applied to the construction of programs used in critical applications. The challenge now is to scale up formal methods and integrate them into engineering development processes for the correct and efficient construction and maintenance of computer systems in general. This requires us to improve the state of the art on approaches and techniques for integration of formal methods into industrial engineering practice including new and emerging practice. The now long established series of International Conferences on Formal Engineering Methods brings together those interested in the application of formal engineering methods to computer systems. Researchers and practitioners from industry, academia and government are encouraged to attend and to help advance the state of the art. This volume contains the papers presented at ICFEM 2009, the 11th International Conference on Formal Engineering Methods, held during December 9-11 in Rio de Janeiro, Brazil.
