Banaji, Anthony G. Greenwald, 2013-02-12 Accessible and authoritative While we may not have much power to eradicate our own prejudices we can counteract them The first step is to turn a hidden bias into a visible one What if we're not the magnanimous people we think we are The Washington Post I know my own mind I am able to assess others in a fair and accurate way These self perceptions are challenged by leading psychologists Mahzarin R Banaji and Anthony G Greenwald as they explore the hidden biases we all carry from a lifetime of exposure to cultural attitudes about age gender race ethnicity religion social class sexuality disability status and nationality Blindspot is the authors metaphor for the portion of the mind that houses hidden biases Writing with simplicity and verve

Banaji and Greenwald question the extent to which our perceptions of social groups without our awareness or conscious control shape our likes and dislikes and our judgments about people's character abilities and potential. In *Blindspot* the authors reveal hidden biases based on their experience with the Implicit Association Test, a method that has revolutionized the way scientists learn about the human mind and that gives us a glimpse into what lies within the metaphoric blindspot. The title's good people are those of us who strive to align our behavior with our intentions. The aim of *Blindspot* is to explain the science in plain enough language to help well-intentioned people achieve that alignment. By gaining awareness we can adapt beliefs and behavior and outsmart the machine in our heads so we can be fairer to those around us. Venturing into this book is an invitation to understand our own minds. Brilliant, authoritative and utterly accessible, *Blindspot* is a book that will challenge and change readers for years to come. Praise for *Blindspot*: Conversational, easy to read and best of all it has the potential at least to change the way you think about yourself. Leonard Mlodinow, *The New York Review of Books*. Banaji and Greenwald deserve a major award for writing such a lively and engaging book that conveys an important message. Mental processes that we are not aware of can affect what we think and what we do. *Blindspot* is one of the most illuminating books ever written on this topic. Elizabeth F. Loftus, Ph.D., distinguished professor, University of California, Irvine, past president, Association for Psychological Science, author of *Eyewitness Testimony*.

History of Electric Cars Nigel Burton, 2013-06-30

One hundred years ago electric cars were the most popular automobiles in the world. In the late nineteenth century and at the start of the twentieth century they outsold every other type of car. And yet within a couple of decades of the start of the twentieth century the electric car had vanished. Thousands of battery-powered cars disappeared from the streets, replaced by the internal combustion engine, and their place in the history of the automobile was quietly erased. A century later electric cars are making a comeback. Fears over pollution and global warming have forced manufacturers to reconsider the electric concept. *A History of Electric Cars* presents for the first time the full story of electric cars and their hybrid cousins. It examines how and why electric cars failed the first time and why today's car manufacturers must learn the lessons of the past if they are to avoid repeating previous mistakes all over again. The book examines in detail early vehicles such as the Lohner-Porsche petrol-electric hybrid of 1901. Key figures in the history of the electric car development such as Henry Ford, Sir Clive Sinclair's plans to build a number of electric vehicles designed to sit alongside the Sinclair C5. The return of the electric technology to vehicles as diverse as the NASA Lunar Rover, commuting vehicles and supercars. Future developments in electric cars. For the first time the full story of electric cars and their hybrids are examined. The hidden past of the electric automobile is uncovered and its future developments are discussed. Superbly illustrated with 300 colour photographs, many of which are rare and original sketch designs. Nigel Burton has written and lectured on cars and automotive history for more than twenty years.
