Yes Is More An Archicomic On Architectural Evolution:

Yes is More BIG Bjarke Ingels Group, 2009 **Yes is More** , 2010 Yes is more is the title of an exhibition and a book presenting B I G in solo format for the first time in Denmark at the Danish architecture centre Unlike a classic architectural monograph this book is more of a popular cultural manifesto which is also literally the first actual documentation of B I G s trailblazing practice As the book demonstrates this is a practice where method processes instruments and the approach to the concept of architecture is precisely as wild unfettered and result producing as the world it is part of and greets with an unqualified Yes **Case Study Strategies for Architects and Designers** Marja Sarvimaki, 2017-06-27 Case Study Strategies for Architects and Designers explains methods in evidence based design also called practice based research to show you the value of research to your designs Topics covered pertain to data collection and analysis techniques including surveys interviews fieldwork participatory design occupancy evaluations and memory sketching Integrative data evaluation theoretical sampling triangulation pattern matching logic and analytical generalization are also discussed Global research precedents exercises further reading section summaries sidebars more than 30 black and white images and tables will help you conduct empirical inquiries in real life contexts **Yes is More** BIG Bjarke Ingels Group, Bjarke Ingels, 2009 This monograph is devoted to the practice of BIG a Copenhagen based group of architects designers and thinkers operating within the fields of architecture urbanism research and development *Boredom and the Architectural Imagination* Andreea Mihalache, 2024-08-05 Boredom as an impetus for architectural theory and practice Any theorist or practitioner of architecture must confront and even be compelled by boredom Called ennui Langeweile or acedia boredom is a pressing concern as the production and obsolescence of images accelerates with new technologies leaving individuals saturated with information presented in fleeting displays that are easy to produce easy to delete and easy to consume In this innovative book Andreea Mihalache discusses the work of a quartet of well known thinkers designer Bernard Rudofsky architects Robert Venturi and Denise Scott Brown and artist Saul Steinberg who all recognized this form of exhaustion and shallowness as the disease of the modern world Rudofsky found it in a deeper and more intimate engagement between the human body and its environment Proclaiming Less is a bore Venturi and later Scott Brown explored excess as the remedy to boredom With detachment and irony Steinberg mocked the homogenous architecture of the American city Taken together Mihalache shows these four offer a comprehensive view of the alienated relationship of individuals with their world at three different yet interrelated scales the body the building and the urban space **The Baroque in Architectural Culture, 1880-1980** Andrew Leach, John Macarthur, 2016-03-09 In his landmark volume Space Time and Architecture Sigfried Giedion paired images of two iconic spirals Tatlin s Monument to the Third International and Borromini s dome for Sant Ivo alla Sapienza The values shared between the baroque age and the modern were thus encapsulated on a single page spread As Giedion put it writing of Sant Ivo Borromini accomplished the movement of the whole pattern from the ground to the lantern without

entirely ending even there And yet he merely groped towards that which could be completely effected in modern architecture achieving the transition between inner and outer space The intellectual debt of modern architecture to modernist historians who were ostensibly preoccupied with the art and architecture of earlier epochs is now widely acknowledged This volume extends this work by contributing to the dual projects of the intellectual history of modern architecture and the history of architectural historiography It considers the varied ways that historians of art and architecture have historicized modern architecture through its interaction with the baroque a term of contested historical and conceptual significance that has often seemed to shadow a greater contest over the historicity of modernism Presenting research by an international community of scholars this book explores through a series of cross sections the traffic of ideas between practice and history that has shaped modern architecture and the academic discipline of architectural history across the long twentieth century The editors use the historiography of the baroque as a lens through which to follow the path of modern ideas that draw authority from history In doing so the volume defines a role for the baroque in the history of architectural historiography and in the history of modern architectural culture

Masterplanning Futures Lucy Bullivant, 2012 Lucy Bullivant analyses the ideals and processes of international masterplans and their role in the evolution of many different types of urban contexts in both the developed and developing world Among the book's key themes are landscape driven schemes social equity through the reevaluation of spatial planning and the evolution of strategies responding to a range of ecological issues and the demands of social growth The author's research was enabled by grants from the Commission for Architecture and the Built Environment CABE the SfA the Netherlands Architecture Fund the Danish Embassy and support from the Alfred Herrhausen Society

Ghosts of Transparency Michael R. Doyle, Selena Savić, Vera Bühlmann, 2019-09-23 In this book the editors focus on architecture and communication from various different perspectives taking into account that the term architecture is used for buildings as well as in the context of computer software Data and software also impact on our cities raw data however do not convey any information in order to generate information and communication they have to be organized and must make sense to the reader The contributions avoid clear separation of the various communication spheres of their disciplines Instead they use the wide range of approaches to explore meanings an ambitious aim that leaves the destination wide open the reader is invited to share in this adventure

The Palladio Method Thorsten Bürklin, Martin Ebert, 2024-03-04 The architect Andrea Palladio was a draughtsman and a designer a mason and an engineer an innovator and an image maker His growing importance from the 16th century onwards was based on his profound expertise in architectural issues that went beyond singular tasks and situations and beyond his particular moment in history His way of thinking and solving architectural problems proved invaluable for centuries to come The contributions to this volume reflect on Palladio's method's beyond historicism and style and thus provide insights into design and building in our time
