Death and Dying Thomas A. Shannon, 2004-05-03 Over a decade ago the field of bioethics was established in response to the increased control over the design of living organisms afforded by both medical genetics and biotechnology. Since its introduction, bioethics has become established as an academic discipline with journals and professional societies; it is covered regularly in the media and affects people everyday around the globe. In response to the increasing need for information about medical genetics and biotechnology, as well as the ethical issues these fields raise, Sheed Ward proudly presents the Readings in Bioethics Series. Edited by Thomas A. Shannon, the series provides anthologies of critical essays and reflections by leading ethicists in four pivotal areas: reproductive technologies, genetic technologies, death and dying, and health care policy. The goal of this series is twofold: first, to provide a set of readers on thematic topics for introductory or survey courses in bioethics or for courses with a particular theme or time limitation. Second, each of the readers in this series is designed to help students focus more thoroughly and effectively on specific topics that flesh out the ethical issues at the core of bioethics. The series is also highly accessible to general readers interested in bioethics. This volume collects critical essays by leading scholars on the definition of death, consciousness, quality of life, tube feeding, palliative care, physician-assisted suicide, and the debate on euthanasia. Included in this volume are works by Paul B. Bascom, David DeGrazia, Ezekiel J. Emanuel, Kathleen Foley, Herbert Hendin, Michael Panicola, Stephen G. Post, Thomas A. Shannon, Charles F. von Gunten, Susan W. Tolle.
