Debulking in Cardiovascular Interventions and Revascularization Strategies On Topaz, 2022-01-21

Debulking in Cardiovascular Interventions and Revascularization Strategies Between a Rock and the Heart aims to provide a comprehensive overview on the diagnostic and therapeutic aspects of resistant lesions as well as tailored debulking processes in revascularization strategies. Cardiovascular interventionalists and surgeons alike frequently encounter technical challenges and increased risk when attempting to diagnose and treat resistant cardiovascular lesions. Bio tissues and vessels calcified plaques, fibrotic or thrombotic lesions, total occlusions, degenerative plaques, complex lesions, and vessels impose morphologic obstacles to the safe and effective delivery and deployment of balloons and stents. In such instances, a debulking strategy involving the actual drilling and extraction of the targeted plaque bio tissue constitutes a unique option that ensures safe and efficacious subsequent balloon dilatations and stenting. A range of topics is included in the book, from the characteristics and constituents of various resistant targets and bio tissues to the corresponding options of debulking methods and finally the technologic and pharmacologic means available for application. The book also provides an up to date description of related management solutions and tools, exploring the medical issues pertaining to the patients with these targets, procedural results and clinical outcomes as related to debulking strategies and associated diagnostic and therapeutic technology and revascularization options.

Review and discussion of the pathophysiology of cardiovascular resistant lesions
Analysis of the impact on revascularization outcome of cardiovascular lesions bio tissues which exhibit resistance to standard revascularization
Introduction of the concept of debulking for revascularization of cardiovascular diseases
