Torpedo Inventing The Military Industrial Complex In The United States And Great Britain:

Torpedo Katherine C. Epstein,2014-01-02 In a bold reappraisal Katherine Epstein uncovers the origins of the military industrial complex not in the Cold War but in the decades before WWI as the United States and Great Britain struggled to perfect a crucial new weapon the self propelled torpedo Torpedo R D sparked intellectual property battles that reshaped national security law *Inventing the Military-industrial Complex* Katherine Cranston Epstein,2011 Between their interaction with industrialization and the new relationship between the government and the private sector torpedoes may be said to have helped put the industrial and the complex in the military industrial complex Their story therefore belongs in larger narratives about the nature of technological change industrialization modern warfare and national development

Making Jet Engines in World War II Hermione Giffard,2016-10-10 Our stories of industrial innovation tend to focus on individual initiative and breakthroughs With Making Jet Engines in World War II Hermione Giffard uses the case of the development of jet engines to offer a different way of understanding technological innovation revealing the complicated mix of factors that go into any decision to pursue an innovative and therefore risky technology Giffard compares the approaches of Britain Germany and the United States Each approached jet engines in different ways because of its own war aims and industrial expertise Germany which produced more jet engines than the others did so largely as replacements for more expensive piston engines Britain on the other hand produced relatively few engines but by shifting emphasis to design rather than production found itself at war s end holding an unrivaled range of designs The US emphasis on development meanwhile built an institutional basis for postwar production Taken together Giffard s work makes a powerful case for a more nuanced understanding of technological innovation one that takes into account the influence of the many organizational factors that play a part in the journey from idea to finished product Capitalism Reloaded Peter Bloom,2025-04-30 Available Open Access digitally under CC BY NC ND license In Capitalism Reloaded Peter Bloom charts a pivotal shift from the well known military industrial complex to a new Authoritarian Financial Complex Unlike its predecessor which centred on armaments and defence this emerging power structure fuses financial interests with advanced surveillance and digital control turning social repression into a lucrative industry Bloom introduces a ground breaking theory of complex power where control itself becomes a central driver of capitalism shaping economies and societies Bloom explores how this insatiable demand for security and profit extends beyond traditional authoritarian regimes permeating everyday life and eroding democratic freedoms This book challenges readers to confront the deep entanglements of modern capitalism before they solidify into a techno authoritarian order **Total Defense** Andrew Preston,2025 In the 1930s amid rising fascism FDR and the New Dealers invented the doctrine of national security which obligated the state to guard against not just territorial invasion but also remote threats to the American way of life Total Defense explores how the new idea of national security transformed the United States and its place in the world Genesis of the Grand Fleet Christopher Buckey,2021-05-15 Genesis of the Grand

Fleet The Admiralty Germany and the Home Fleet 1896 1914 tells the story of the prewar predecessor to the Royal Navy's war winning Grand Fleet the Home Fleet Established in early 1907 by First Sea Lord Sir John Fisher the Home Fleet combined an active core of powerful armored warships with a unification of the various reserve divisions of warships previously under the control of the three Royal Navy home port commands Fisher boasted that the new Home Fleet would be able to counter the growing German Hochseeflotte While these boasts were accurate they were not the sole motivation behind the Home Fleet's establishment The Liberal Party's landslide victory in the 1906 General Election made fiscal economy on the part of the Admiralty even more important than before and this significantly influenced the Home Fleet's creation Subsequently the Home Fleet suffered a sustained campaign of criticism by the commander in chief of the Channel Fleet Lord Charles Beresford This campaign ruined many careers including Beresford's and resulted in the assimilation of the Channel Fleet into the Home Fleet in 1909 From 1910 onward the Home Fleet steadily evolved and became the most important single command in the Royal Navy and the Home Fleet's successive commanders in chief had influence on strategic policy rivaled only by the Board of Admiralty The last prewar commander of the Home Fleet Admiral Sir George Callaghan achieved this influence by impressing the civilian head of the Admiralty Winston Churchill A driven reformer Churchill's influence was almost as important as Fisher's Against this backdrop of political drama Genesis of the Grand Fleet The Admiralty Germany and the Home Fleet 1896 1914 explains how Britain maintained its maritime preeminence in the early twentieth century As Christopher Buckey describes the fleet sustained Britain and her allies path to victory in World War I **A Companion to the Gilded Age and Progressive Era** Christopher McKnight Nichols, Nancy C.

O'Hara, Trent Hone, 2025-01-16 Fighting in the Dark is a new book about naval combat at night the title also however signifies the overarching theme of the book of moving from dark to light in short the process of mastering technological change during war The authors start with the proposition that it is hard to hit an invisible target particularly one in motion In the nineteenth century when ships relied upon visual signaling and vessels beyond hailing range were deaf and mute in the dark night battles at sea were rare and largely accidental Three inventions changed this the torpedo the searchlight and the radio These inventions at the end of the nineteenth and start of

the twentieth centuries transformed naval warfare by making combat in the dark feasible and in some cases desirable The process by which navies used the dark and adapted it into a medium for effective combat was long and difficult more so for some than others This book is about that process and about how Russian British German Italian Japanese and US navies confronted the specific new challenges and adapted to unfamiliar situations and emerging technologies Fighting in the Dark consists of chapters written by a group of highly respected naval historians and the book s approach illuminates how different navies and cultures approached common problems The fierce night time battles that are described serve as a metaphor for the larger issues and the reader is led along a fascinating journey of naval warfare from the Russo Japanese War through WWI to the Second World War and from the Pacific to the English Channel **American Foreign Relations**

Andrew Preston,2019-04-01 This book identifies illuminating the central importance of US foreign relations to the existence and survival of the nation as well as how they have impacted the destinies of societies and states worldwide *The Routledge History of Global War and Society* Matthew S.
