Rognstad,Taina Pihlajarinne,Jukka Mähönen,2024-07-26 The book explores the role of public market actors in sustainable
and circular economy innovation and financing The shift to a circular economy requires active innovation alongside radical
changes in law finance and policy considerations since regulation is often tightly connected with the assumption of a linear
model of consumption Finance is crucial in creating sustainable and circular economy markets and innovations public finance
is important from the perspective of seeing the state as an engine for promoting sustainable innovations but private funds are
also required Legislative initiatives for promoting repairs have been proposed or adopted in the EU US and in Australia
representing remarkable steps forward but still leaving many obstacles without legislative intervention This book examines
circular economy regulation and policy on a comprehensive general level as well as assessing the regulatory possibilities of
promoting the right to repair Promotion of circular economy innovations as well as changing the practices and changing
consumer patterns towards a more comprehensive adoption of CE are discussed from perspectives of legal social and moral
norms The book critically evaluates current legislative reforms and assesses existing barriers to the circular economy and
innovation in intellectual property law consumer law and competition law Providing an in depth analysis of this dynamic field
geared towards reconsidering both existing and prospective policies and regulatory regime the book makes
recommendations for solutions to legislative barriers It is an indispensable resource for both researchers and practitioners
