Wonder Image And Cosmos In Medieval Islam:

Wonder, Image, and Cosmos in Medieval Islam Persis Berlekamp, 2011 This original book untangles fundamental confusions about historical relationships among Islam representational images and philosophy Closely examining some of the most meaningful and best preserved premodern illustrated manuscripts of Islamic cosmographies Persis Berlekamp refutes the assertion often made by other historians of medieval Islamic art that while representational images did exist they did not serve religious purposes The author focuses on widely disseminated Islamic images of the wonders of creation Show more This original book untangles fundamental confusions about historical relationships among Islam representational images and philosophy Closely examining some of the most meaningful and best preserved premodern illustrated manuscripts of Islamic cosmographies Persis Berlekamp refutes the assertion often made by other historians of medieval Islamic art that while representational images did exist they did not serve religious purposes The author focuses on widely disseminated Islamic images of the wonders of creation ranging from angels to human snatching birds and argues that these illustrated manuscripts aimed to induce wonder at God s creation as was their stated purpose She tracks the various ways that images advanced that purpose in the genre s formative milieu the century and a half following the Mongol conquest of the Islamic East in 1258 Delving into social history and into philosophical ideas relevant to manuscript and image production Berlekamp shows that philosophy occupied an established if controversial position within Islam She thereby radically reframes representational images within the history of Islam

Imagination and Fantasy in the Middle Ages and Early Modern Time Albrecht Classen, 2020-08-24 The notions of other peoples cultures and natural conditions have always been determined by the epistemology of imagination and fantasy providing much freedom and creativity and yet have also created much fear anxiety and horror In this regard the pre modern world demonstrates striking parallels with our own insofar as the projections of alterity might be different by degrees but they are fundamentally the same by content Dreams illusions projections concepts hopes utopias dystopias desires and emotional attachments are as specific and impactful as the physical environment This volume thus sheds important light on the various lenses used by people in the Middle Ages and the early modern age as to how they came to terms with their perceptions images and notions Previous scholarship focused heavily on the history of mentality and history of emotions whereas here the history of pre modern imagination and fantasy assumes center position Imaginary things are taken seriously because medieval and early modern writers and artists clearly reveal their great significance in their works and their daily lives This approach facilitates a new deep structure analysis of pre modern culture

Medieval Marvels and Fictions in the Latin West and Islamic World Michelle Karnes, 2022-07-12 A cross cultural study of magical phenomena in the Middle Ages Marvels like enchanted rings and sorcerers stones were topics of fascination in the Middle Ages not only in romance and travel literature but also in the period s philosophical writing Rather than constructions of belief accepted only by simple minded people Michelle Karnes shows that these spectacular

wonders were near impossibilities that demanded scrutiny and investigation This is the first book to analyze a diverse set of writings on such wonders comparing texts from the Latin West including those written in English French Italian and Castilian Spanish with those written in Arabic as it works toward a unifying theory of marvels across different disciplines and cultures Karnes tells a story about the parallels between Arabic and Latin thought reminding us that experiences of the strange and the unfamiliar travel across a range of genres spanning geographical and conceptual space and offering an ideal vantage point from which to understand intercultural exchange Karnes traverses this diverse archive showing how imagination imbues marvels with their character and power making them at once enigmatic creative and resonant Skirting the distinction between the real and unreal these marvels challenge readers to discover the highest capabilities of both nature and the human intellect Karnes offers a rare comparative perspective and a new methodology to study a topic long recognized as central to medieval culture
