Wonderful Life The Burgess Shale And The Nature Of History:

Wonderful Life: The Burgess Shale and the Nature of History Stephen Jay Gould, 1989 Explains why the diversity of the Burgess Shale is important in understanding our past and evolution **Wonderful Life** Stephen Jay Gould, 2000 Centring on the discovery in the Burgess Shale of 530 million year old fossils unique in age preservation and diversity this book challenges perceptions about man's place in the history of life **Wonderful Life [sound Recording] : the Burgess Shale and the Nature of History** Gould, Stephen Jay, 1991 **Wonderful Life** Steven James Gold, 1989 **Wonderful Life** Stephen Jay Gould, 2014-02-03 An extraordinary book Mr Gould is an exceptional combination of scientist and science writer He is thus exceptionally well placed to tell these stories and he tells them with fervor and intelligence James Gleick New York Times Book Review High in the Canadian Rockies is a small limestone quarry formed 530 million years ago called the Burgess Shale It holds the remains of an ancient sea where dozens of strange creatures lived a forgotten corner of evolution preserved in awesome detail In this book Stephen Jay Gould explores what the Burgess Shale tells us about evolution and the nature of history **The Story of Life in 25 Fossils** Donald R. Prothero, 2015-08-25 Every fossil tells a story Best selling paleontology author Donald R Prothero describes twenty five famous beautifully preserved fossils in a gripping scientific history of life on Earth Recounting the adventures behind the discovery of these objects and fully interpreting their significance within the larger fossil record Prothero creates a riveting history of life on our planet The twenty five fossils portrayed in this book catch animals in their evolutionary splendor as they transition from one kind of organism to another We witness extinct plants and animals of microscopic and immense size and thrilling diversity We learn about fantastic land and sea creatures that have no match in nature today Along the way we encounter such fascinating fossils as the earliest trilobite Olenellus the giant shark Carcharocles the fish-like Tiktaalik the Frogamander and the Turtle on the Half Shell enormous marine reptiles and the biggest dinosaurs known the first bird Archaeopteryx the walking whale Ambulocetus the gigantic hornless rhinoceros Paraceratherium the largest land mammal that ever lived and the Australopithecus nicknamed Lucy the oldest human skeleton We meet the scientists and adventurers who pioneered paleontology and learn about the larger intellectual and social contexts in which their discoveries were made Finally we find out where to see these splendid fossils in the world's great museums Ideal for all who love prehistoric landscapes and delight in the history of science this book makes a treasured addition to any bookshelf stoking curiosity in the evolution of life on Earth **Second Genesis, A: Stepping-stones Towards The Intelligibility Of Nature** Julian Chela-flores, 2008-12-29 A Second Genesis enquires why nature is intelligible The fast growth of technology and deeper understanding of the humanities have provided significant clues Answering the question why nature can be understood requires an introduction to the new science of astrobiology and the exploration of the Solar System A careful discussion of a second Genesis is presented namely our present awareness that life may have emerged on other worlds Writing this volume has been motivated by the

need to encourage a constructive dialogue between science and faith. Such an objective for a new book is timely since science is inserted with well defined frontiers in the context of human culture. Similarly the frontiers of faith do not require religion to justify itself in scientific terms avoiding current unnecessary controversies. This book intends to engage readers interested in the position of humans in nature. It makes a serious effort to avoid demanding detailed knowledge of science philosophy or theology but will require some careful reading and meditation.

Expanding Worldviews: Astrobiology, Big History and Cosmic Perspectives Ian Crawford, 2021-06-07. This book collates papers presented at two international conferences held at the Australian National University in 2018 and Birkbeck College London in 2019 exploring the relationships between big history and astrobiology and their wider implications for society. These two relatively new academic disciplines aim to integrate human history with the wider history of the universe and the search for life elsewhere. The book will show that despite differences in emphasis big history and astrobiology share much in common especially their interdisciplinary approaches and the cosmic and evolutionary perspectives that they both engender. Specifically the book addresses the unified all embracing nature of knowledge the impact of big history on humanity and the world at large the possible impact of SETI on astrobiology and big history the cultural signature of Earth's inhabitants beyond our own planet and the political implications of a planetary worldview. The principal readership is envisaged to comprise scholars working in the fields of astrobiology big history and space exploration interested in forging interdisciplinary links between these diverse topics together with educators and a wider public interested in the societal implications of the cosmic and evolutionary perspectives engendered by research in these fields.
