Designing Accessible Technology P. John Clarkson,P. Langdon,P. Robinson,2006-08-02 Rapid and unprecedented population ageing poses a serious social and economic challenge across the developed world Shifts in dependency ratios point to escalating welfare and pensions costs which require radical and imaginative responses from Government and industry Key to this is a healthy population able and willing to work longer before retirement and who can be independent for as long as possible afterwards as well as bringing disabled people into mainstream life and employment This book was stimulated by the 3rd CWUAAT workshop the CWUAAT workshops have a general focus on product and solution development It was held in Cambridge UK in April 2006 Contributions from leading researchers focused on design issues for a more inclusive world enabling computer access and the development of new technologies assistive technology and rehabilitation robotics and understanding users and involving them in design Design for Inclusivity Roger Coleman,John Clarkson,Julia Cassim,2016-04-08 Inclusive design not only ensures that products services interfaces and environments are easier to use for those with special needs or limitations but in doing so also makes them better for everyone Design for Inclusivity written by a team that has pioneered inclusive design practice internationally reviews the recent social trends and pressures that have pushed this subject to the fore and assesses design responses to date in an international context The authors make the business case for inclusive design and explain the formalisation of the approach in standards and legislation The text includes case studies which describe transport product development IT and service projects as well as industry university collaborative projects and highlights lessons that have been learned This is very much a practical book It offers tools techniques guidelines and signposts for the reader to key resources as well as including advice on research methods and working with users and industry partners

Biocomposites for High-Performance Applications Dipa Ray,2017-05-15 Biocomposites for High Performance Applications Current Barriers and Future Needs Towards Industrial Development focuses on future research directions that will make biocomposites a successful player in the field of high strength structural applications With contributions from eminent academic researchers and industrial experts who have first hand experience on the advantages disadvantages of biocomposites in their daily lives the book examines the industrial development of biocomposite products identifying the current barriers and their future industrial needs Topics covered include recent research activities from academia in the biocomposite research field valuable thoughts and insights from biocomposite manufacturing industries the strength and weaknesses of biocomposite products and the practical issues that need to be addressed to reach the next level Highlights the practical issues involved in biocomposites research Contains contributions from eminent academic researchers and industrial experts Discusses recent research activities from academia in the biocomposite research field along with valuable thoughts and insights from biocomposite manufacturing industries

Applications of Natural Fibres Jörg Müssig, 2010-04-15 Natural fibres are becoming increasingly popular for use in industrial applications providing sustainable solutions to support technical innovation These versatile natural based materials have applications in a wide range of industries from textiles and consumer products to the automotive and construction industries Industrial Applications of Natural Fibres examines the different steps of processing from natural generation fibre separation and fibre processing to the manufacturing of the final product Each step is linked to fibre properties and characterization highlighting how different fibres influence the product properties through a discussion of their chemical and structural qualities Considering the value added chain from natural generation to final product with emphasis on quality management this book reviews the current research and technical applications of natural fibres Topics covered include Introduction to the Chemistry and Biology of Natural Fibres Economic Aspects of Natural Fibres Vegetable Fibres Animal Fibres Testing and Quality Management Applications Current and Potential Industrial Application of Natural Fibres will be a valuable resource for scientists in industry and academia interested in the development of natural based materials and products It is particularly relevant for those working in chemical engineering sustainable chemistry agricultural sciences biology and materials sciences

Natural Fiber Composites R.D.S.G. Campilho, 2015-11-05 This book brings value to anyone working with or designing natural fiber composite structures It helps readers understand the value these materials can add to projects how to choose the best materials and treatments how to safely design and fabricate products made of natural fiber composites and how to test them for safety It covers the characterization of natural fibers matrices and respective composites and how to enhance their performance and processing as well as testing and degradation issues

Manufacturing of Natural Fibre Reinforced Polymer Composites Mohd Sapuan Salit, Mohammad Jawaidd, Nukman Bin Yusoff, M. Enamul Hoque, 2015-09-10 Natural fibre composite is an emerging material that has great potential to be used in engineering application Oil palm sugar palm bagasse coir banana stem hemp jute sisal kenaf roselle rice husk betel nut husk and cocoa pod are among the natural fibres reported to be used as reinforcing materials in polymer composites Natural fibre composites were used in many industries such as automotive building furniture marine and aerospace industries The advantages of natural fibre composites include low cost renewable abundance light weight less abrasive and they are suitable to be used in semi or non structural engineering components Research on various aspects of natural fibre composites such as characterization determination of properties and design have been extensively carried out However publications that reported on research of manufacture of natural fibre composites are very limited Specifically although manufacturing methods of components from natural fibre composites are similar to those of components from conventional fibre composites such as glass carbon and Kevlar fibres modification of equipment used for conventional fibre composites may be required This book fills the gap of knowledge in the field of natural fibre composites for the research community Among the methods reported that are being used to produce components from natural fibre composites include hand lay up compression

moulding filament winding injection moulding resin transfer moulding pultrusion and vacuum bag moulding This book is also intended to address some research on secondary processing such as machining and laser welding of natural fibre composites It is hoped that publication of this book will provide the readers new knowledge and understanding on the manufacture of natural fibre composites *Bibliographic Guide to Technology* New York Public Library.
