Trade Offs Negotiating The Omnibus Trade And Competitiveness Act

I. M. Destler

Trade Offs Negotiating The Omnibus Trade And Competitiveness Act:

Trade-offs Susan Carol Schwab,1994 Discusses the business implications of the Omnibus Trade Act of 1988 and explains why this law was a milestone in United States trade policy **American Trade Politics, 4th Edition** , In this comprehensive revision of the most influential widely read analysis of the US trade policymaking system Destler addresses how globalization has reshaped trade politics weakening traditional protectionism but intensifying concern about trade s societal impacts Entirely new chapters treat the deepening of partisan divisions and the rise of trade and issues especially labor and the environment The author concludes with a comprehensive economic and political strategy to cope with globalization and maximize its benefits The original edition of American Trade Politics won the Gladys Kammerer Award of the American Political Science Association for the best book on US national policy **American Trade Politics and the Triumph of Globalism** Orin Kirshner,2014-05-09 A deep and unresolved tension exists within American trade politics between the nation s promotion of an open world trading system and the operations of its democratic domestic political regime Whereas most scholarly attention has focused on how domestic politics has interfered with the United States global economic leadership Orin Kirshner offers here an analysis of the ways in which U S leadership in the arena of global trade has affected American democracy and the domestic political regime By participating in multilateral trade agreements the U S Congress has transferred its trade policymaking authority to the president and through international trade negotiations from the American state to the GATT WTO regime This reorganization of policymaking authority has resulted in the triumph of globalism and fundamentally alters the citizen state relationship assumed in democratic theory Kirshner illustrates this process through four case studies The Reciprocal Trade Agreements Act of 1945 The Trade Expansion Act of 1962 The Trade Act of 1974 The Omnibus Trade and Competitiveness Act of 1988 and further examines the impact of the Uruguay Round Agreements Act of 1994 on the political and institutional structure of American trade politics up to the current period American Trade Politics and the Triumph of Globalism makes a significant contribution to the study of both international trade and domestic American politics This is essential reading for students and scholars of trade policy international political economy American politics and democratic theory **American Trade Politics** I. M. Destler,2005-06-08 In this comprehensive revision of the most influential widely read analysis of the US trade policymaking system Destler addresses how globalization has reshaped trade politics weakening traditional protectionism but intensifying concern about trade s societal impacts Entirely new chapters treat the deepening of partisan divisions and the rise of trade and issues especially labor and the environment The author concludes with a comprehensive economic and political strategy to cope with globalization and maximize its benefits The original edition of American Trade Politics won the Gladys Kammerer Award of the American Political Science Association for the best book on US national policy *U.S. Trade Policy* William A. Lovett,Alfred E. Eckes, Jr,Richard L. Brinkman,2015-02-24 Lovett Tulane Law School Eckes a former commissioner of the U S

International Commission during the Reagan and Bush I administrations and Brinkman international economics Portland State U evaluate the evolution of U S trade policy focusing on the period from the establishment of the Gen *Protection for Exporters* Andreas Dür,2010 The liberalization of transatlantic trade relations since the Great Depression is one of the key developments in the global political economy of the last hundred years This period has seen the negotiated reduction of both tariffs and nontariff barriers among developed countries which allowed for the rapid expansion of trade flows a driving force of economic globalization In *Protection for Exporters* Andreas D r provides a novel explanation for this phenomenon that stresses the role of societal interests in shaping trade politics He argues that exporters lobby more in reaction to losses of foreign market access than in pursuit of opportunities thus providing a rationale for periods of acceleration and slowdown in the pace of liberalization D r also presents hypotheses about the form in which protection for exporters is provided preferential or nonpreferential and the balance of concessions that is exchanged in trade negotiations *Protection for Exporters* includes case studies of major developments in international trade relations such as the passage of the Reciprocal Trade Agreements Act in the 1930s the creation of the General Agreement on Tariffs and Trade in the 1940s the Kennedy Round in the 1960s the debate over Fortress Europe in the 1980s and U S European competition over access to emerging markets in the early 2000s D r s rigorous argument and systematic empirical analyses not only explain transatlantic trade relations but also allow for a better understanding of the dynamics of international economic relations **U.S. Trade Law and Trade Policy** , *U.S. Trade Issues* Alfred E. Eckes Jr.,2009-10-13 An expert analysis of key issues individuals and developments in U S trade policy from national regional and global perspectives What is the proper balance between free trade and protecting the American economy U S Trade Issues A Reference Handbook is a timely exploration of this vital and politically sensitive question one that emerged as a crucial issue in the 2008 presidential election Written by a former chairman of the U S International Trade Commission it provides an authoritative accessible and unbiased review of the defining events principal players and key controversies in U S trade policy U S Trade Issues describes American trade policies from the days of the republic to the present focusing most intently on the post World War II era It explores a number of current issues including the Doha Round of Multilateral Negotiations NAFTA and the president s trade authority In addition the handbook looks at American trade policy in the context of an increasingly globalized world economy **The Domestic Sources of American Foreign Policy** Eugene R. Wittkopf,James M. McCormick,2004 Now in its fourth edition this comprehensive survey of the interaction between domestic and international politics shows how public opinion interest groups the media the intelligence establishment and the different branches of American government influence US foreign policy formulation with a special emphasis on national security issues in the wake of the attacks of September 11 2001 innovation in key arenas including Cuba Afghanistan and the war on terrorism Prominent contributors including Joseph S Nye Jr Stanley Hoffmann and Fred I Greenstein from academic and policy communities combine practical and theoretical

perspectives to offer this well rounded complement to courses in American government foreign policy and international relations

The Domestic Politics of Negotiating International Trade Johanna von Braun, 2012-03-29

The Domestic Politics of International Trade considers the issues surrounding intellectual property rights in international trade negotiations in order to examine the challenges posed to domestic policy makers by the increasingly broad nature of Free Trade Agreements FTAs Throughout the book the author demonstrates the importance of domestic politics in understanding the nature and outcome of international negotiations particularly as they relate to international economic diplomacy The book looks in detail at the intellectual property negotiations which formed part of the US Peru and US Colombia Free Trade Agreements and analyses the extent to which public health authorities and other parties affected by the increased levels of intellectual property protection were integrated into the negotiation process The book then juxtaposes these findings with an analysis of the domestic origins of US negotiation objectives in the field of intellectual property paying particular attention to the role of the private sector in the development of these objectives Based on a substantial amount of empirical research including approximately 100 interviews with negotiators capital based policy makers private sector representatives and civil society organisations in Lima Bogot and Washington DC this book offers a rare account of different stakeholders perceptions of the FTA negotiation process Ultimately the book succeeds in integrating the study of domestic politics with that of international negotiations This book will be of particular interest to academics as well as practitioners and students in the fields of international law economic law intellectual property political economy international relations comparative politics and government
