The Wine Revolution in France Leo A. Loubère, 2014-07-14 During the past eight decades French vineyards wineries and wine marketing efforts have undergone such profound changes from technological scientific economic and commercial standpoints that the transformation is revolutionary for an industry dating back thousands of years Here Leo Loubre examines how the modernization of Western society has brought about new conditions in well established markets making the introduction of novel techniques and processes a matter of survival for winegrowers Not only does Loubre explain how altered environmental conditions have enabled pioneering enologists to create styles of wine more suited to contemporary tastes and living arrangements but he also discusses the social impact of the wine revolution on the employees in the industry The third generation of this new viticultural regime has encountered working and living conditions drastically different from those of its predecessors while witnessing the near disappearance of the working class and the decline of small and medium growers of ordinary wines Originally published in 1990 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Regime Stability, Social Insecurity and Bauxite Mining in Guinea Penda Diallo, 2019-10-16 This book explores how bauxite mining has affected local and national political dynamics in Guinea over the past 55 years providing an overview of mining interactions with social economic and political spheres Guinea

is amongst the world's top producers of bauxite and the country's rich mineral presence has numerous implications on local communities and national policy. Guinea is an interesting and highly relevant case study in assessing the impact of bauxite mining on regime stability and social insecurity. The author offers a clear understanding of the role of mining during the Tour and Cont regimes and analyses how changes since the election of Condé in 2010 have affected the socio-political and economic development of Guinea. The author also offers analysis on how bauxite mining has led to the emergence of new forms of social contracts sustained by mining companies instead of the state. Finally, the book argues that understanding the stabilising and destabilising potential of mining is key to ensuring long-term sustainable, stable and inclusive growth of mineral resource-rich countries. The book concludes by highlighting the relevance of the findings in Guinea for the wider African extractives sector. The book will be of interest to a wide range of scholars including those working in the areas of African studies, political science, political economy, sustainable development and corporate social responsibility. The book will be relevant for academics, business actors, NGOs, policy makers and students interested in the African mining sector.

Archambault, 1997 This is the first book to reveal the extent to which nonprofit organisations, despite their invisibility in official statistics, have become one of the clearest expressions of social and cultural change in France. Edith Archambault argues that the nonprofit organisations have a unique ability to marry private initiative with public concerns and therefore become the most flexible partners of modern social policies. *Dictionnaire des l'économie politique contenant l'exposition des principes de la science, l'opinion des écrivains qui ont le plus contribué à sa fondation et à ses progrès, la bibliographie générale de l'économie politique ...* Charles Coquelin, 1852 *General Catalogue of Printed Books to 1955* British Museum. Dept. of Printed Books, 1967 Japan and the European Periphery James Darby, 2016-07-27 The book describes Japanese economic links with peripheral regions in Europe. Focusing particularly on manufacturing investment, the impact of Japanese firms is assessed against a background of increasing European economic integration. The uneven distribution of Japan's economic presence in Europe is emphasised, as is the importance of core economic regions for future investment activity. The growing importance of core regions is then linked to emerging patterns in the growth of science-based industries, as well as efforts by national and regional agencies to attract inward investment. The Nature of Space Milton Santos, 2021-07-21 In *The Nature of Space*, pioneering Afro-Brazilian geographer Milton Santos attends to globalization writ large and how local and global orders intersect in the construction of space. Santos offers a theory of human space based on relationships between time and ontology. He argues that when geographers consider the

inseparability of time and space they can then transcend fragmented realities and partial truths without trying to theorize their way around them Based on these premises Santos examines the role of space which he defines as indissoluble systems of objects and systems of actions in social processes while providing a geographic contribution to the production of a critical social theory
