Reading Children's Literature: A Critical Introduction - Second Edition Carrie Hintz, Eric L. Tribunella, 2019-03-28
Reading Children's Literature offers insights into the major discussions and debates currently animating the field of children's literature. Informed by recent scholarship and interest in cultural studies and critical theory, it is a compact core text that introduces students to the historical contexts, genres, and issues of children's literature. A beautifully designed and illustrated supplement to individual literary works assigned, it also provides apparatus that makes it a complete resource for working with children's literature during and after the course. The second edition includes a new chapter on children's literature and popular culture, including film, television, and merchandising, and has been updated throughout to reflect recent scholarship and new offerings in children's media.

Defect and Fault Tolerance in VLSI Systems C.H. Stapper, V.K. Jain, Gabriele Saucier, 1990-10-31
Higher circuit densities increasingly more complex application objectives and advanced packaging technologies have substantially increased the need to incorporate defect tolerance and fault tolerance in the design of VLSI and WSI systems. The goals of defect tolerance and fault tolerance are yield enhancement and improved reliability. The emphasis on this area has resulted in a new field of interdisciplinary scientific research. In fact, advanced methods of defect fault control and tolerance are resulting in enhanced manufacturability and productivity of integrated circuit chips. VLSI systems and wafer scale integrated circuits. In 1987, Dr. W. Moore organized an International Workshop on Designing for Yield at Oxford University. Edited papers of that workshop were published in reference II. The participants in that workshop agreed that meetings of this type should be continued preferably on a yearly basis. It was Dr. I. Koren who organized the IEEE International Workshop on Defect and Fault Tolerance in VLSI Systems in Springfield, Massachusetts the next year. Selected papers from that workshop were published as the first volume of this series.
