Universos distópicos y manipulación en la comunicación contemporánea: del periodismo a las series pasando por la política Virginia Guarinos Galán, 2023-10-27 El Gobierno de la penalidad. La complejidad de la Política criminal

contemporânea Brandariz García, José Ángel, 2014-09-19 El presente texto pretende reflexionar sobre la evolución reciente de la Política criminal desde una mirada atenta a transformaciones básicas que se han verificado en los campos económico social político y cultural en las últimas décadas En este sentido el libro se preocupa especialmente por analizar tendencias que presentan como principal denominador común la progresiva emergencia de una racionalidad de gobierno en el ámbito punitivo esto es de gestión y eficiencia de las políticas penales Se trata de una cuestión que ha sido profusamente debatida en relación con la Dogmática jurídico penal pero que seguramente puede ser reconsiderado en un marco analítico más amplio No obstante el texto evita considerar el objeto de estudio como un espacio liso En efecto si bien las racionalidades gerenciales parecen tener su momento de auge en los últimos lustros del s XX diversos fenómenos manifestados desde el inicio de la siguiente centuria generan contextos más híbridos en las políticas penales En primer lugar el sistema penal no ha resultado inmune a los efectos de la guerra contra el terrorismo que ha protagonizado el devenir global durante buena parte de la primera década del siglo Ese ha sido el tiempo de auge de las formas básicas y excluyentes de control policial y punitivo En segundo lugar en los años transcurridos del s XXI otro gran evento ha venido a poner término a esa etapa la Gran Recesión Se trata de un acontecimiento que ha venido infundiendo de forma notable sobre la evolución del sistema penal ya que entre otras cuestiones ha obligado a asumir que también las políticas penales están sometidas a la ley de los recursos escasos En suma el sistema penal está hoy sometido a las exigencias de una racionalidad de gobierno y gestión Sin embargo es químicamente rico imaginar que la Política criminal puede regirse exclusivamente por esa semántica racionalista de gobierno y gestión aunque solo sea porque en su devenir siempre han influido de forma nuclear elementos simbólicos y culturales Por ello un análisis de la Política criminal actual ha de renunciar a cualquier pretensión de unidimensionalidad Si algo caracteriza la Política criminal del presente es su radical complejidad pues en ella conviven tendencias heterogéneas que frecuentemente producen tensiones evidentes La reflexión de este texto se enmarca en la absoluta consciencia de esa complejidad

When money is not above everything Igor Vinicius Lima Valentim, 2020-06-17 Can we still dream of a more egalitarian and fairer world Do we want it Can we find now in our current time concrete examples of people living and working in different settings than corporations and profit oriented organizations Do we want to Is there something different going on Or is it all just a utopia portrayed in books and movies We live the imperative of winning always and at any price Results matter but not how we get to them We do not see ourselves as complementary or interdependent The other human beings have become adversaries competitors enemies What shocks me most is how many of us consider this kind of mindset policies and ways of life to be natural People aspire to grow more and more within these ready and available ideals of success Success for whom At the cost of whom Me first Me second Me third But that is not unanimous Not everyone thinks feels and desires to live like this I always get confused when I think that we are in the middle of the 21st century with so much technology so many resources of all kinds so many possibilities of making the world a better place for everybody and not just for a tiny group and we still consider that the standard way to work generate income find the necessary means to live

is to fit within the model that is the most common to work in highly hierarchical utilitarian private companies where one commands and the others obey where people are managed by fear of losing their job and livelihood the next day By the way how is it possible that in the same organization one earns a thousand times more than the other How can this be supported applauded justified and even desired by so many people Something that I often think about is what do we stimulate when we adhere to determined values practices and behaviors What are we signaling as natural as positive What are we re producing I am sure there are other ways of living and working How and where can I find them It is rare to perceive incentives to collective mobilization ways of managing life and organizations that stimulate values such as cooperation solidarity and egalitarianism We cannot fail to question and even deconstruct what seems to represent the nature of people and things including to show that the modes of existence are neither unique nor inevitable I did not want to just complain Denouncing debating discussing all fundamental But I wanted to go further I was curious to look for concrete alternatives Practical possibilities Concrete experiences To live To experiment Until 2004 I had never heard of Solidarity Economy associativism or even self management But there are initiatives in which profit does not seem to be above all You must pick them up listen to them You must live them I love listening to stories and dreams I love learning from how people build their existences and what types of values and societies these modes stimulate It was essential to meet people who together fight for other ways of working and being based on attitudes and values that are more loving and focused on life than those who today seem naturalized to many people but that have nothing of natural I write this book with narratives linked to what I lived and felt processes experiences experimentations Theory is treated here as a tool not as an end I try hard to make it a job with and not about people and companies I have learned a lot I took many life lessons During my journeys I have heard and witnessed something that seems contrary to what many preach and believe there are other suppliers other qualities of dough Everybody must win Everyone must sell Everyone must have their space I hope that this book can affect you raise questions concerns actions and changes especially in the direction of more just egalitarian and supportive worlds
