Hibou, 2015-05-06 Contemporary bureaucracy is a set of norms rules procedures and formalities which includes administration business and NGOs Where Max Weber meets Michel Foucault B atrice Hibou analyzes the political dynamics underlying this process Neoliberal bureaucracy is a vector of discipline and control producing social and political indifference Contractual Knowledge Grégoire Mallard, Jérôme Sgard, 2016-05-26 Contractual Knowledge One Hundred Years of Legal Experimentation in Global Markets edited by Gr goire Mallard and J r me Sgard extends the scholarship of law and globalization in two important directions First it provides a unique genealogy of global economic governance by explaining the transition from English law to one where global exchanges are primarily governed by international multilateral and finally transnational legal orders Second rather than focusing on macro political organizations like the League of Nations or the International Monetary Fund the book examines elements of contracts including how and by whom they were designed and exactly who experts courts arbitrators or international organizations interpreted upheld and established the legal validity of these contracts By exploring such micro level aspects of market exchanges this collection unveils the contractual knowledge that led to the globalization of markets over the last century *The Oxford Handbook of Political Science* Robert E. business itself Even seasoned observers will gain insight into the industry's singular milieu from Alexandre's piercing eye He spends as much time with Silicon Valley's major players as with those who fight daily to survive within a system engineered for disruption Embedded deep within the community Alexandre accesses rooms shut tight to the public and reports back on the motivations ambitions and radical vision guiding tech companies From the conquest of space to quantum computing engineers have recast the infinitely large and small Some scientists predict the end of death and the replacement of human beings with machines But at what cost Alexandre sees a shadow hanging over the Valley jeopardizing its future and the economy made in its image Critical yet fair Tech illuminates anew a world of perpetual revolution
