of the Academic Disciplines Michele Antoinette Paludi, Gertrude A. Steuernagel, 1990 Here is a useful and illustrative guide for those interested in the impact of feminist scholarship on traditional academic disciplines This important book explores the changes that have taken place in the academic world as a result of feminist approaches to scholarship including issues of staffing organization administration recruitment student support faculty advancement and learning Appropriate for readers not familiar with feminist scholarship as well as for those who are deeply interested in the message of feminist scholarship Foundations for a Feminist Restructuring of the Academic Disciplines comes out of the experiences of women who are intimately involved with feminist pedagogy and curriculum transformation The contributors describe a variety of educational environments that feminists have established in the academy reflecting various disciplines This profoundly important book raises new questions about the bias in traditional education and challenges basic assumptions about women in education and society In chapter after chapter readers discover changes in perspective and knowledge brought on by feminist approaches to scholarship the common images of women in literature written by men and contrast them with women writers revisions of these traditional images the elimination and or misrepresentation of women in the history books a feminist perspective on and critique of the image of women as traditionally analyzed by economists the major feminist challenges to political science the traditional and contemporary approaches to women in psychological theory and research how the teaching and practice of medicine as it is related to women and women s health issues has served to communicate an unfair and erroneous image of woman Women of Crisis Robert Coles, 1988 **The "Underclass" Debate** Michael B. Katz, 2018-06-05 Do ominous reports of an emerging underclass reveal an unprecedented crisis in American society Or are social commentators simply rediscovering the tragedy of recurring urban poverty as they seem to do every few decades Although social scientists and members of the public make frequent assumptions about these questions they have little information about the crucial differences between past and present By providing a badly needed historical context these essays reframe today s underclass debate Realizing that labels of social pathology echo fruitless distinctions between the deserving and undeserving poor the contributors focus not on individual and family behavior but on a complex set of processes that have been at work over a long period degrading the inner cities and inevitably the nation as a whole How do individuals among the urban poor manage to survive How have they created a dissident infrapolitics How have social relations within the urban ghettos changed What has been the effect of industrial restructuring on poverty Besides exploring these questions the contributors discuss the influence of African traditions on the family patterns of African Americans the origins of institutions that serve the urban poor the reasons for the crisis in urban education the achievements and limits of the War on Poverty and the role of income transfers earnings and the contributions of family members in overcoming poverty The message of the essays is clear Americans will flourish or fail together Labor Literature United States. autopathography illness narratives and stigmatized illness through the observations and stories of a chaplain working at a facility for people with HIV and AIDS Trained as both an ethnographer and a chaplain Audrey Elisa Kerr uses memoir to bridge the relationship between caregiver and patient and allows stories of marginality to frame both her patients stories and her own **Women's Work and Chicano Families** Patricia Zavella, 2018-03-15 No detailed description available for Women s Work and Chicano Families
