The Psychology of Women, 7th Ed Margaret W. Matlin, 2012 *The Psychological Development of Girls and Women* Sheila Greene, 2014-11-27 Choice Recommended Read This thoroughly revised new edition updates Sheila Greene's original transformative account of the psychological development of girls and women and the central role of time in shaping human experience Greene critically reviews traditional and contemporary theoretical approaches ranging from orthodox psychoanalysis to relational and post modern theories and argues that even those that claim to focus on development have presented a view of women's lives as fixed and determined by their nature or their past These theories she believes should be rejected because of their inherent lack of validity and their frequently oppressive implications for women Essential but often neglected insights from the more compelling developmental and feminist theories are woven together within a theoretical framework that emphasizes temporality emergence and human agency The result is a liberating theory of women's psychological development as constantly emerging and changing in time rather than as static and fixed by their nature socio cultural context and personal history Updated for a new generation of readers *The Psychological Development of Girls and Women* will continue to be essential reading for students and researchers in the psychology of women developmental psychology and women's studies

Feminist Psychology Vera Sonja Maass, 2021-12-06 Detailing the field of feminist psychology since its origins this book assesses its early figures theory and research as well as current and emerging theory and research and its associations with general feminist beliefs Feminist psychology developed as a reaction to historical psychological thought initiated by men who controlled the theory and research of the field By holding all of society to norms based in male behavior this so called masculine psychology effectively assigned women lower societal status than men and had disturbing effects on women's health and self esteem Feminist Psychology focuses on gender differences

social structure and the values and principles of women's rights within the world's individual social and political spheres. Contrary to popular notion, feminist psychology does not involve man-hating but instead focuses on loving the concept that women have equal potential to set and achieve goals and to contribute to society. In this volume, psychologist Vera Maass explains the history, theory, research, and current state of this growing field, which is becoming increasingly popular as colleges offer majors or concentrations in feminist psychology and argues that women are both different from and equal to men.

Women and Aging Varda Muhlbauer, Joan C. Chrisler, Florence L. Denmark, 2014-10-20. These are paradoxical times to be an older woman. As individual older women take the stage as role models in the arts and the public sphere, female elders as a group are marginalized as dependent, declining, and unimportant. *Women and Aging* surveys the evolving sociopolitical landscape in an era still struggling with gender and age discrimination. This insightful volume recasts familiar concepts such as social roles, appearance, health, sexuality, and transition through the related lenses of empowerment, restraint, and quality of life, well-being, for a deeper understanding of the disparities that exist both with men and within their own gender. Two especially relevant questions emerge from this framework: how women over 60 are contributing to the current climate of societal change, and how these positive developments can improve the lives of older women as a whole. Featured topics analyze the wider implications of older women's experiences as family members, sensual and sexual beings, drivers of economies, and members of a diverse population worldwide. Older women, power, and the body. Older women, economic power, and consumerism. The impact of multiple roles on older women. Strain or enrichment. Older women, leadership, and encore careers. Sexuality in older women. Desirability and desire. Lesbians over 60. Newer, every day. Clinical interventions to empower older women. A significant advance in feminist research. *Women and Aging* brings path-breaking perspectives to scholars in women's studies, gerontology, psychology, sociology, social work, and human development, whether they study women who have overcome barriers or those who need support in changing the rules.
