

- Q11. The higher the temperature of the water, the faster the scattering of the dye.
- Q12. The particles are moving fastest in the container with hot water. The particles are moving slowest in the container with cold water.
- Q13. The higher the temperature of the water, the greater the speed of the moving particles.
- Q14. The higher the temperature, the greater the kinetic energy of the particles.

Thermal Expansion

- Explain how liquid thermometers work using the concept of thermal expansion.
- Demonstrate the activity described or suggested in the module to explain thermal expansion of solid.
- Emphasize that objects or materials expand when heated and contract when cooled. But emphasize also that different materials expand or contract to different extents when heated or cooled.
- If time permits, ask the students to research more on the applications of thermal expansion to real life.

Phase Change

Activity

3.1

What happens when ice melts?

Teaching Tips

1. If the materials are available, some groups or students may be allowed to use a burner to heat the beaker of ice. Then let them compare their results and explain the difference in terms of the effect of the amount of heat absorbed by the ice to the time the ice takes to melt completely.
