Challenges and Solutions in Forecasting and Decision-Making in Marine Economy and Management Xuemei Li, Kevin Li, Junjie Wang, Song Ding, 2025-08-11 The marine economy and management pertain to the sustainable utilization of marine resources through internal and external coordination across departments with a focus on maximizing social and economic benefits However the persistence of activities such as overfishing offshore oil spills and excessive coastal development has led to escalating issues like offshore eutrophication ocean acidification warming and marine plastic pollution posing significant threats to marine sustainability In alignment with the United Nations Sustainable Development Goal 14 substantial progress has been achieved by ocean management researchers in analyzing fishery resource management optimization of marine industrial structures development of marine energy and adaptation of marine climate change These studies hold crucial theoretical significance and practical value for understanding the state of the marine economy guiding management practices ensuring marine ecological security and fostering sustainable ocean development

What determines green purchase behavior? Zhongju Liao, Shufeng Xiao , Siying Long, 2024-05-31 Green purchase behavior refers to consumers purchasing green products that are environmentally friendly using fewer resources and causing lower environmental impact and risk As a growing number of people start to recognize the importance of individual responsibility for environmental protection firms are increasingly motivated to develop green products to fit the needs of this green advocacy Despite an emerging number of consumers claiming their preference towards green brands compared to traditional alternatives researchers have found that there is a huge gap between consumers purchase intention and actual behavior which has gained much attention The psychological process of green purchase behavior may be a complicated process influenced by various factors such as consumer values and norms the pros and cons marketed for green products and various other situational factors Scholars are calling for research that explores the psychological decision making process of green purchase behavior from both theoretical and practical perspectives Due to the high pricing of green products the trade off between the price and function of green products may lower consumers satisfaction Thus there is always a gap between green purchase intention and actual purchase behavior What determines consumers actual green purchase behavior Under what conditions will the consumers pay a premium price for green products What prompts consumers to choose green brands over traditional alternatives Will green consumption be a passing trend or a long term consumption habit What influences the frequency of consumers green purchasing Scholars are welcome to share their opinions and findings about green purchase behavior to help explore this research topic We are extremely interested in the determinants of green purchase behavior and the mechanism of facilitating green consumption considering different perspectives *MSIEID 2022*
