Fire of Mercy, Heart of the Word, Vol 2 Erasmo Leiva-Merikakis,1996-01-01

To the unstudied eye St Matthew's gospel can seem a terse narrative almost a historical document and not the tremendously spiritual and doctrinal storehouse that it is In his third volume of meditations on Matthew chapters 19-25 Erasmo Leiva continues to show Matthew's prose to be not terse so much as economical astoundingly so given its depth The lay reader can derive great profit from reading this Each short meditation comments on a verse or two pointing to some facet of the text not immediately apparent but rich with meaning Leiva's work is scholarly but eminently approachable by the lay reader The tone is very much of taste and see how good the Lord is and an invitation of friend come up higher The goal of the book is to help the reader experience the heat of the divine heart and the light of the divine Word Leiva comments on the Greek text demonstrating nuances in the text that defy translation He uses numerous quotes from the Fathers and the Liturgy of the Church to demonstrate the way the Tradition has lived and read the Word of God His theological reflection vivifies doctrine by seeking its roots in the words and actions of Jesus Journal of the Senate of the Commonwealth of Pennsylvania

Introduction to sonar** United States. Bureau of Naval Personnel, 2018-09-29 SONAR sound navigation and ranging systems have many similarities to RADAR and electro optical systems Again detection is based on the

propagation of waves between the target and detector There are active sonar systems where the wave propagates from the transmitter to the target and back to the receiver analogous to pulse echo radar There are also passive sonar systems where the target is the source of the energy which propagates to the receiver analogous to passive infrared detection Therefore a great deal of what has been discussed about these systems will also apply to sonar Sonar however differs fundamentally from radar and electro optics because the energy is transferred by acoustics waves propagating in water So we first begin by discussing the characteristics of acoustic waves
