abstract Working Capital Management's hereafter abbreviated WCM accepted purpose has been the management of a firm's current assets and current liabilities in a way that achieves the optimum balance between liquidity and profitability. On the one hand obviously a high level of net working capital implies funds invested in current assets that increase a firm's liquidity but reduces its returns because current assets are less profitable than long term assets. On the other hand however a low level of net working capital results in increased profitability since funds are put to better use but increases the firm's risk of technical insolvency. The bottom line is that any suboptimal level of net working capital in the end reduces the return to shareholders by lowering the firm's value. Gitman 2000 p 616. However the collect early push out the product and pay late attitude familiar to many treasurers squeezes both customers and suppliers and is increasingly recognized as short term and potentially damaging to business. Hall 2002 p 29. Therefore it is of supreme importance to understand the complex and not openly visible ties of working capital and its components to a company's strategy and operations rather than treating WCM as an isolated task. WCM for multinational corporations is in its core very similar to purely domestic WCM. However in the international realm there exist a few essential differences that add complexity. Consider the impact of currency fluctuations potential exchange controls and multiple tax jurisdictions in addition to the wider range of short term financing and investment options available. Shapiro 2005 p 516. This paper will discuss the main components of WCM international cash management accounts receivables payables etc as well as the implications of managing working capital in the international sphere while taking into consideration a more profound approach to WCM that goes beyond the superficial understanding of working capital as an isolated item solely under the control of the finance or treasury department.

WORKING CAPITAL MANAGEMENT, Fourth Edition BHATTACHARYA, HRISHIKES, 2021-04-01. Working capital is commonly understood as the fund needed to meet the day to day expenses of an enterprise. A finance manager finds that the funds for meeting these expenses get blocked in current assets. He therefore looks for liquidity support in net working capital NWC which is equivalent to the excess of current assets over current liabilities. A banker also looks at the size of NWC as the long term stake of the business in funding the current assets. But for a production manager liquidity is synonymous to uninterrupted supply of material inputs to the production lines. Similarly for a marketing manager if there is no production his marketing outlets dry up despite demand in the market. While the finance manager discourages overstocking of inventory the production manager and the marketing manager dread of being out of stock. In this conflict the goal of the organisation often takes a back seat. This book aims at resolving these conflicts by adopting a techno financial approach to working capital management. In the previous edition a full chapter on Service Business Risk Analysis and Working Capital Assessment was introduced to understand the nature of service business and the risks associated with it followed by developing a model for assessment of working capital requirement. Whereas in the Fourth Edition a new chapter on Technological Progress Innovations and Startups A New Financing Methodology has been introduced to fill a long felt gap in financing of emerging

industries Besides the book is revised and updated extensively by incorporating the current researches in the field particular mention can be made of Cash pooling system Bullwhip effect and newer approaches to inventory recording system Throughout the book every concept is presented with worked out examples and case studies for easy comprehension of the subject The book is primarily addressed to postgraduate students majoring in Finance and to those pursuing professional courses in Accounts CA and Cost Accounting ICWA The book will also be very useful for practising finance executives risk managers and also purchase materials managers TARGET AUDIENCE o MBA Finance o CA and ICWA Aspirants

Working Capital Management during and after the Global Financial Crisis. Evidence from Germany

Christopher Thees, 2015-11-11 Bachelor Thesis from the year 2015 in the subject Business economics Investment and Finance grade 1.3 Leuphana Universität Lüneburg Institut für Bank Finanz und Rechnungswesen IBFR course Bachelorkolloquium language English abstract The present thesis tries to figure out if the Working Capital Management of German companies is reactive to changing interest rates for their refunding or if it is really a pro active improvement since the beginning of the 2000s as claimed by the literature After a theoretical definition of Working Capital its functions goals and its relationship to the management process Working Capital will be set into a context of company crises to lead to the central object of investigation the Global Financial Crisis With a quantitative analysis via DataStream of the companies currently listed in the DAX MDAX and SDAX N 130 it will be examined if the credit crunch for companies in the Global Financial Crisis and the easy refunding possibilities afterwards due to the easy money policy of the European Central Bank had effects on the quality of the Working Capital Management The analysis of the data via SPSS will show that the possibilities of refunding indeed influence this quality whereby the intensity of the reactionary behaviour of the companies depends mainly on the object of cognition which is in this thesis examined by the parameters size age and industry sectors so that the results could serve as a basis for further management research
