Women In Mathematics The Addition Of Difference Race Gender And Science:

Women in Mathematics Claudia Henrion,1997-01-01 Uses the profiles of nine women mathematicians to explore the nature of the participation of women in mathematical research and surrounding issues of gender and race **Race, Gender, and Science** Rebecca Reviere,2003 *Women Scientists in America* Margaret W. Rossiter,2012-04-02 With the thoroughness and resourcefulness that characterize the earlier volumes she recounts the rich history of the courageous and resolute women determined to realize their scientific ambitions *Young Women of Achievement* Frances A. Karnes,2010-06-03 Are you planning a career in the sciences math or technology If you re a girl you probably should be It is estimated that by the year 2010 the need for qualified personnel in science and technology careers will increase dramatically Yet right now only 16 percent of women are involved in science and engineering careers despite the fact that women make up 45 percent of the total labor force All this means that opportunities abound for women in the sciences This upbeat very useful resource guide will give young women everything they need to start exploring and planning a career in science math or technology Part I introduces readers to the many exciting career opportunities available in the sciences and provides specific strategies for planning for a future career in these areas Part II recounts true stories of girls and young women in the sciences detailing how they got involved and what they have accomplished Part III offers timelines of extraordinary women throughout history inspiring quotations a list of Web sites specifically geared toward women in the sciences suggestions for science oriented computer software and many other recommended resources If you have an interest in science this excellent guide full of useful information will start you on the path toward realizing your career dreams Frances A Karnes Ph D Hattiesburg MS is the director of The Frances A Karnes Center for Gifted Studies at the University of Southern Mississippi Kristen R Stephens Ph D Durham NC is the support services coordinator for the Duke University Talent Identification Program *Using the Mathematics Literature* Kristine K. Fowler,2004-05-25 This reference serves as a reader friendly guide to every basic tool and skill required in the mathematical library and helps mathematicians find resources in any format in the mathematics literature It lists a wide range of standard texts journals review articles newsgroups and Internet and database tools for every major subfield in mathemati **The Gender and Science Reader** Muriel Lederman,Ingrid Bartsch,2001 The Gender and Science Reader brings together key articles in a comprehensive investigations of the nature and practice of science **Gender and Boyle's Law of Gases** Elizabeth Potter,2001-04-22 Gender and Boyle s Law of Gases Elizabeth Potter Re examines the assumptions and experimental evidence behind Boyle s Law Boyle s Law which describes the relation between the pressure and volume of a gas was worked out by Robert Boyle in the mid 1600s His experiments are still considered examples of good scientific work and continue to be studied along with their historical and intellectual contexts by philosophers historians and sociologists Now there is controversy over whether Boyle s work was based only on experimental evidence or whether it was influenced by the politics and religious controversies of the time

including especially class and gender politics Elizabeth Potter argues that even good science is sometimes influenced by such issues and she shows that the work leading to the Gas Law while certainly based on physical evidence was also shaped by class and gendered considerations At issue were two descriptions of nature each supporting radically different visions of class and gender arrangements Boyle's Law rested on mechanistic principles but Potter shows us an alternative law based on hylozoic principles the belief that all matter is animated whose adherents challenged social stability and the status quo in 17th century England Elizabeth Potter Alice Andrews Quigley Professor of Women's Studies at Mills College is co editor of *Feminist Epistemologies* and author of numerous articles on feminist epistemology and feminist philosophy of science *Race Gender and Science* Anne Fausto Sterling general editor June 2001 232 pages 5 figs 6 x 9 index cloth 0 253 33916 2 34 95 L 26 50 paper 0 253 21455 6 17 95 s 13 95 Reinventing the Male Homosexual Robert Alan Brookey, 2002-03-15 Reinventing the Male Homosexual The Rhetoric and Power of the Gay Gene examines the assumption that embracing the biological research on homosexuality is a viable political strategy for the gay rights movement The biological argument for gay rights is treated as a bio rhetoric a means of incorporating scientific research into public debates The book investigates the biological research on which this gay rights argument is based and explores how male homosexuality is conceptualized in the fields of behavioral genetics neuroendocrinology sociobiology and evolutionary psychology Robert Alan Brookey demonstrates that most biological research begins with the assumption that male homosexuality is a state of physical effeminate pathology Although biological research may seem to support a pro gay rights agenda the same research can actually be used to support conservative political interests **Girls and Women in STEM** Janice Koch, Beverly Irby, Barbara Polnick, 2014-01-01 Encouraging the participation of girls and women in science technology engineering and mathematics STEM remains as vital today as it was in the 1970s hence the sub title A Never Ending Story This volume is about ongoing advocacy on behalf of the future workforce in fields that lie on the cutting edge of society's future Acknowledging that deeply embedded beliefs about social and academic entitlement take generations to overcome the editors of this volume forge forward in the knowledge that these chapters will resonate with readers and that those in positions of access will learn more about how to provide opportunities for girls and women that propel them into STEM fields This volume will give the reader insight into what works and what does not work for providing the message to girls and women that indeed STEM fields are for them in this second decade of the 21st century Contributions to this volume will connect to readers at all levels of STEM education and workforce participation Courses that address teaching and learning in STEM fields as well as courses in women's studies and the sociology of education will be enhanced by accessing this volume Further students and scholars in STEM fields will identify with the success stories related in some of these chapters and find inspiration in the ways their own journeys are reflected by this volume *Toward a Global Science* Susantha Goonatilake, 1998 Asian science such as mathematics Chinese printing gunpowder and the compass all contributed to the development of European science During the last few centuries however

scientific contributions with Asian roots have diminished and been marginalized and deligitimised Yet the center of the world economy today is shifting to Asia with shifts in science and technology bound to follow Toward a Global Science is driven by the proposition that pre Renaissance acquisition of Asian knowledge did not exhaust Asian civilization s potential contribution There are many useful elements to modern science still lying hidden in Asian civilizational stores waiting to be mined The author gives details of recent contributions from South Asian medicine mathematics and psychology and explores how South Asian inputs can be useful in navigating the philosophical and ethical problems raised by two dominant technologies of the future namely biotechnology and information technology As an illustrative example it describes how a fruitful marriage of one technology virtual reality with South Asian philosophy can enliven both the technology as well as philosophy It also examines how Asian positions could be used to feed some key contemporary philosophical discussions on science Using a model of the civilizational construction of science the book views science without Eurocentric blinders It documents how science was built initially by transfers from non European civilizations and why the given historiography of science has to be rethought Throughout the book the author gives examples of parallels and antecedents between East and West in science and estimates the potential reservoir of Asian knowledge in each field The book also deals with the many knotty problems in recovering science from past traditions The author distinguishes between his secular efforts from religious and other attempts that claim the equivalence of all knowledge systems

NWSA Journal ,1999

The Quest for the Inner Human Steven H. Propp, 2013-12-03 Psychology means the study of the soul it is the social science concerned with investigating who we are why we have certain feelings and why we do the things we do Are we no more than a vast assembly of nerve cells and their associated molecules Is biology our genetic inheritance destiny or does social upbringing play a crucial role What are the roles played by Nature and by Nurture Are we purely physical beings or is there an aspect that can be called spiritual This thought provoking novel takes you on a journey of intellectual and emotional exploration considering along the way questions that weve all asked ourselves such as Is it true that we only use 10% of our brains Does playing classical music for infants increase their intelligence Do crime rates go up during a full moon Can hypnosis or post hypnotic suggestions make us do something we wouldnt normally do Does subliminal advertising influence us to buy products Are our memories stored

indelibly almost like a tape recorder What causes memory lapses as we age Can repressed traumatic memories be recovered through hypnosis Do some people have multiple personalities How can I tell if someone has a neurosis or a psychosis Do men have an inner feminine side and women an inner masculine Are there innate psychological differences between males and females The four main characters in this book will guide you through a diverse and sometimes bewildering world of differing approaches to answering such questions such as Freudian Jungian and Adlerian Humanistic Existential and Transpersonal as well as Cognitive Emotive and Behaviorist Along the way you will learn about the developmental stages proposed by psychologists such as Erikson Kohlberg Piaget and Fowler and even explore some of the questions currently being asked by both neuroscientists and philosophers of the mind Start reading to begin your study of our innermost selves

Mujeres en la investigación matemática, escenarios de visibilización Nelsy Rocío González Gutiérrez, 2020-10-21 Esta investigación muestra formas de participación de las mujeres en avance del desarrollo científico desde sus aportes en matemática especialmente destaca la trayectoria de tres matemáticas colombianas Se analizan los factores de mayor incidencia durante el proceso de formación académica en sus logros científicos Es un análisis desde la historia social de la educación que compara el desarrollo de los estudios en matemáticas en tres universidades colombianas así como la situación relativa a los géneros tanto académica como social Por medio de la historia oral se examina la influencia del entorno familiar en la elección de la carrera profesional de tres matemáticas colombianas destacadas La estructuración se basa en los métodos de la historia social se acude a la fenomenología para la descripción narración de los hechos y se apoya en la hermenéutica para la interpretación de los datos recolectados La comparación de la educación de estas tres eminentes matemáticas nos permite concluir que su avance académico estuvo motivado gracias a su propia iniciativa y a sus vivencias en la formación escolar Y por último queremos resaltar que el gran logro académico con su Doctorado en Matemáticas significa la conquista del desafío de ser ejemplos de vida e inspiración para futuras matemáticas
