Women, Knowledge, and Reality Ann Garry, Marilyn Pearsall, 2015-07-17 This second edition of *Women Knowledge and Reality* continues to exhibit the ways in which feminist philosophers enrich and challenge philosophy Essays by twenty five feminist philosophers seventeen of them new to the second edition address fundamental issues in philosophical and feminist methods metaphysics epistemology and the philosophies of science language religion and mind body This second edition expands the perspectives of women of color of postmodernism and French feminism and focuses on the most recent controversies in feminist theory and philosophy The chapters are organized by traditional fields of philosophy and include introductions which contrast the ideas of feminist thinkers with traditional philosophers The collected essays illustrate both the depth and breadth of feminist critiques and the range of contemporary feminist theoretical perspectives **Women, Knowledge, and Reality** Ann Garry, 1989 This second edition of *Women Knowledge and Reality* continues to exhibit the ways in which feminist philosophers enrich and challenge philosophy Essays by twenty five feminist philosophers seventeen of them new to the second edition address fundamental issues in philosophical and feminist methods metaphysics epistemology and the philosophies of science language religion and mind body This second edition expands the perspectives of women of color of postmodernism and French feminism and focuses on the most recent controversies in feminist theory and philosophy The chapters are organized by traditional fields of philosophy and include introductions which contrast the ideas of feminist thinkers with traditional philosophers The collected essays illustrate both the depth and breadth of feminist critiques and the range of contemporary feminist theoretical perspectives Wendy R. Kohli, Nicholas C. Burbules, 2012-07-01 The latest book in the *Philosophy Theory and Educational Research* series introduces the main philosophical and theoretical ideas of recent western feminisms as it applies to educational research Unlike other books that focus on these topics the authors present a balanced overview of the issues instead of pushing a particular perspective *Virtue in Dialogue* Mara Brecht, 2014-03-05 Religious diversity is a persistent theological predicament for Christian thinkers Historically theologians have wrestled with the relationship between believing Christians and religious others The clash between the Christian doctrine of salvation and non Christian belief systems often comes down to the question can non Christians be saved In a pluralist world a second question arises can believers of divergent traditions reconcile their theological differences Is the logical answer that one believer abandon her faith convictions and promote a relativistic mindset This book draws upon original research documenting conversations by women in an interreligious dialogue group to show that when believers converse in honesty empathy and patience in short when engaged in virtuous dialogue they can bridge the gap left by theory When believers from different faiths come together in open conversation it need not lead to relativism but instead can lead to strengthened belief Sharing convictions with people who believe differently sincere believers find they often come to hold their own core beliefs with newfound strength **Women's Studies** Linda

Krikos, Cindy Ingold, 2004-08-30 This truly monumental work maps the literature of women's studies covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The result is this truly monumental work which maps the field, covering thousands of titles and Web sites in 19 subject areas published between 1985 and 1999. Intended as a reference and collection development tool, this bibliography provides a guide for women's studies information for each title along with a detailed, often evaluative review. The annotations summarize each work's content, its importance or contribution to women's studies, and its relationship to other titles on the subject. Most reviews cite and describe similar and contrasting titles, substantially extending the coverage. Core titles and titles that are out of print are noted, and reviews indicate which titles are appropriate as texts or supplemental texts. Taking up where the previous volume by Loeb Searing and Stineman left off, this is the definitive guide to the literature of women's studies. It is a must purchase for academic libraries that support women's studies programs, and a welcome addition to any academic or public library that endeavors to represent the field.

The Political Economy of Affect and Emotion in East Asia Jie Yang, 2014-05-09

When thinking about the culture and economy of East Asia, many attribute to the region a range of dispositions including a preference for consensus and social harmony, loyalty and respect towards superiors and government, family values, collectivism, and communitarianism. Affect is central to these concepts, and yet the role of affect and its animated or imagined potentialities in the political economy of East Asia has not been systematically studied. The book examines the affective dimensions of power and economy in East Asia. It illuminates the dynamics of contemporary governance and ways of overcoming common Western assumptions about East Asian societies. Here, affect is defined as felt quality that gives meaning and imagination to social, political, and economic processes, and as this book demonstrates, it can provide an analytical tool for a nuanced and enriched analysis of social, political, and economic transformations in East Asia. Through ethnographic and media analyses, this book provides a framework for analyzing emerging phenomena in East Asia, such as happiness promotion, therapeutic governance, the psychologization of social issues, the rise of self-help genres, transnational labor migration, new ideologies of gender and the family, and mass-mediated affective communities. Through the lens of affect theory, the contributors explore changing political configurations, economic engagements, modes of belonging, and forms of subjectivity in East Asia, and use

ethnographic research and discourse analysis to illustrate the affective dimensions of state and economic power and the way affect informs and inspires action This interdisciplinary book will be of great interest to students and scholars of Asian studies anthropology sociology media studies history cultural studies and gender and women s studies Feminist Ethics Claudia Card,1991 Fifteen essays address subjects ranging from the history of feminist ethics to the logic of pluralist feminism and present feminist perspectives on such topics as terrorism bitterness women trusting other women and survival and ethics Paper edition unseen 14 95 Annotation copyrighted by Book News Inc Portland OR Eros for the Other Wendy Farley,2010-11-01 *Modern Motherhood and Women's Dual Identities* Petra Bueskens,2018-05-31 Why do women in contemporary western societies experience contradiction between their autonomous and maternal selves What are the origins of this contradiction and the associated double shift that result in widespread calls to either lean in or opt out How are some mothers subverting these contradictions and finding meaningful ways of reconciling their autonomous and maternal selves In *Modern Motherhood and Women's Dual Identities* Petra Bueskens argues that western modernisation consigned women to the home and released them from it in historically unprecedented yet interconnected ways Her ground breaking formulation is that western women are free as individuals and constrained as mothers with the twist that it is the former that produces the latter Bueskens theoretical contribution consists of the identification and analysis of modern women s duality drawing on political philosophy feminist theory and sociology tracking the changing nature of discourses of women freedom and motherhood across three centuries While the current literature points to the pervasiveness of contradiction and double shifts for mothers very little attention has been paid to how some women are subverting contradiction and rewriting the sexual contract Bridging this gap Bueskens interviews ten revolving mothers to reveal how periodic absence exceeding the standard work day disrupts the default position assigned to mothers in the home and in turn disrupts the gendered dynamics of household work A provocative and original work *Modern Motherhood and Women's Dual Identities* will appeal to graduate students and researchers interested in fields such as Women and Gender Studies Sociology of Motherhood and Social and Political Theory *Women and American Politics* Susan J. Carroll,2003-02-06 *Women and American Politics* brings together leading scholars in the field of women and politics to provide an account of recent developments and the challenges that the future brings for the study of gender and American Politics The book examines women s participation in the electoral arena and the emerging scholarship on the relationship between the media and women in politics the participation of women of colour and women s activism outside the electoral arena This volume demonstrates both the wealth of knowledge about women and American politics by the current generation of scholars and the vast number and range of important research questions which pose a challenge for the next generation *Bodied Mindfulness* Winnie Tamm,2010-10-30 I see spirituality and social change to be integrally related to each other I believe that liberation efforts that are supported by spiritual experiences of integration promote human dignity as well as social equality *Bodied*

Mindfulness combines spiritual social and analytical perspectives to explore topics central to women's development spirituality women's bodies cultural constructions of women's sexuality in language sexual ethics the sexual contract in politics and at work and the relation between nature and culture It is Tamm's deeply held conviction that women need to bring a vital spirituality to feminist social criticism in order to resolve these issues and increase their power to promote social justice and ecological balance Tamm embraces a vast store of knowledge from diverse sources including Buddhist shamanist and feminist resources In a move away from abstract theorizing she explicitly connects theory with realities lived by women Grounding theory in personal experience her own and others Tamm delivers a powerful and empowering account of women's spirituality The resulting ontological transformation allows women to live deeply in the body while strengthening their relation to human and non human matter and energy Bodied Mindfulness will be of great interest to feminist scholars in all disciplines but most particularly to those in Women's Studies and Religious Studies

Who Succeeds in Science? Gerhard Sonnert, Gerald James Holton, 1995 Why don't more women become scientists And why do those who do become scientists often face more difficulties than their male counterparts Every year about a quarter of a million young men and women in the United States receive their first academic degree in science mathematics or engineering A small fraction will eventually become research scientists But many who start out with that goal fail to reach it for reasons that may have less to do with their scientific ability than with their gender Drawing on a wealth of information 699 questionnaires and 200 interviews from men and women who gave every promise of scientific achievement Gerhard Sonnert and Gerald Holton illuminate the partly gender driven dynamics of the leaky scientific pipeline At the heart of this book are gripping personal life stories of ten women and ten men half became highly successful scientists the rest left research science In their own voices they talk candidly about their career paths the obstacles and assists they encountered the difficulties and rewards of attempting to combine a family life with a science career This highly readable analysis of the gender dimension in scientific careers and its clear headed advice will be of great interest to everyone considering a career in science as well as to teachers parents and active scientists Academics in sociology of science and gender studies as well as decision makers in the areas of human resources and science policy will also welcome its discussions of general issues and policy recommendations

Artificial Knowing Alison Adam, 2006-07-13 Artificial Knowing challenges the masculine slant in the Artificial Intelligence AI view of the world Alison Adam admirably fills the large gap in science and technology studies by showing us that gender bias is inscribed in AI based computer systems Her treatment of feminist epistemology focusing on the ideas of the knowing subject the nature of knowledge rationality and language are bound to make a significant and powerful contribution to AI studies Drawing from theories by Donna Haraway and Sherry Turkle and using tools of feminist epistemology Adam provides a sustained critique of AI which interestingly re enforces many of the traditional criticisms of the AI project Artificial Knowing is an essential read for those interested in gender studies science and technology studies and philosophical debates in AI

Global Democracy, Social Movements, And Feminism Catherine Eschle, 2018-03-08 In Global Democracy Social Movements and Feminism Catherine Eschle examines the relationship between social movements and democracy in social and political thought in the context of debates about the exclusions and mobilizations generated by gender hierarchies and the impact of globalization Eschle considers a range of approaches in social and political thought from long standing liberal republican Marxist and anarchist traditions through post Marxist and post modernist innovations and recent efforts to theorize democracy and social movements at a global level The author turns to feminist theory and movement practices and particularly to black and third world feminist interventions in debates about the democratization of feminism itself Eschle discusses the ways in which such debates are increasingly played out on a global scale as feminists grapple with the implication of globalization for movement organization The author then concludes with a discussion of the relevance of these feminist debates for the theorization of democracy more generally in an era of global transformation
