Feminist Translation Studies Olga Castro,Emek Ergun,2017-02-17 *Feminist Translation Studies Local and Transnational Perspectives* situates feminist translation as political activism Chapters highlight the multiple agendas and visions of feminist translation and the different political voices and cultural heritages through which it speaks across times and places addressing the question of how both literary and nonliterary discourses migrate and contribute to local and transnational processes of feminist knowledge building and political activism This collection does not pursue a narrow fixed definition of feminism that is based solely on Eurocentric or West centric gender politics rather *Feminist Translation Studies Local and Transnational Perspectives* seeks to expand our understanding of feminist action not only to include feminist translation as resistance against multiple forms of domination but also to rethink feminist translation through feminist theories and practices developed in different geohistorical and disciplinary contexts In so doing the collection expands the geopolitical sociocultural and historical scope of the field from different disciplinary perspectives pointing towards a more transnational interdisciplinary and overtly political conceptualization of translation studies

Gender Justice, Development, and Rights Maxine Molyneux,Shahra Razavi,2002-11-07 Recent years have seen a shift in the international development

agenda in the direction of a greater emphasis on rights and democracy While this has brought many positive changes in women's rights and political representation in much of the world these advances were not matched by increases in social justice Rising income inequalities coupled with widespread poverty in many countries have been accompanied by record levels of crime and violence Meanwhile the global shift in the consensus over the role of the state in welfare provision has in many contexts entailed the down sizing of public services and the re allocation of service delivery to commercial interests charitable groups NGOs and households Gender Justice Development and Rights reflects on this ambivalent record and on the significance accorded in international development policy to rights and democracy in the post Cold War era Key items on the contemporary policy agenda neo liberal economic and social policies democracy and multiculturalism are addressed here by leading scholars and regional specialists through theoretical reflections and detailed case studies Together they constitute a collection which casts contemporary liberalism in a distinctive light by applying a gender perspective to the analysis of political and policy processes Case studies from Latin America sub Saharan Africa Middle East East Central Europe South and South east Asia contribute a cross cultural dimension to the analysis of contemporary liberalism the dominant value system in the modern world and how it exists and is resisted in developing and post transition societies

Fires on the Border Rosemary Hennessy, 2013-12-01 The history of the maquiladoras has been punctuated by workers organized resistance to abysmal working and living conditions Over years of involvement in such movements Rosemary Hennessy was struck by an elusive but significant feature of these struggles the extent to which organizing is driven by attachments of affection and antagonism belief betrayal and identification What precisely is the affective dimension of organizing for justice Are affects and emotions the same And how can their value be calculated *Fires on the Border* takes up these questions of labor and community organizing its affect culture on Mexico's northern border from the early 1970s to

the present day Through these campaigns Hennessy illuminates the attachments and identifications that motivate people to act on behalf of one another and that bind them to a common cause The book s unsettling even jarring narratives bring together empirical and ethnographic accounts of specific campaigns the untold stories of gay and lesbian organizers love and utopian longing in concert with materialist theories of affect and the critical good sense of Mexican organizers Teasing out the integration of affect culture in economic relations and cultural processes Hennessy provides evidence that sexuality and gender as strong affect attractors are incorporated in the harvesting of surplus labor At the same time workers testimonies confirm that the capacities for bonding and affective attachment far from being entirely at the service of capital are at the very heart of social movements devoted to sustaining life Globalization and Social Movements Valentine M.

Moghadam,2020-02-17 What is the connection between globalization and social movements How have people collectively responded to globalization s economic political and cultural manifestations and challenges And how are contemporary social movements and networks affecting the progression of globalization This clear and concise book answers these questions by examining social movements and transnational networks in the context of globalization in all its forms economic political cultural and technological alike Deftly combining nuanced theory with rich empirical examples leading scholar Valentine M Moghadam provides four in depth case studies global feminism and transnational feminist networks global Islamism ranging from parliamentary to extremist the global justice movement and the World Social Forum and varieties and gender dynamics of populisms In a new chapter she draws attention to the emergence and growth of right wing populist movements political parties and governments not only in Europe but in the Global South as well Defining globalization as a complex process in which the movement of capital peoples organizations movements and ideas takes on an increasingly international form the author shows how growing physical and electronic mobility has helped to create dynamic global social movements Exploring the historical roots of Islamism feminism global justice and populism Moghadam also shows how these movements have been stimulated by relatively recent globalization processes She reveals their similarities and differences internal differentiation relationship to globalization and states and the opportunities and challenges that the movements face Assessing the extent to which the movements contribute to democracy or conversely endanger it she considers prospects for a renewed and more robust form of democracy Informed by feminist world systems world polity and social movement theories in a seamlessly integrated framework her work will be essential reading for all students of globalization *Voicing Demands* Sohela

Nazneen, Maheen Sultan,2014-01-16 *Voicing Demands* is a collection of analytical narratives of what has happened to feminist voice a key pathway to women s empowerment These narratives depart from the existing debate on women s political engagement in formal institutions to examine feminist activism for building and sustaining constituencies through raising negotiating and legitimizing women s voice under different contexts Bringing together the reflections and experiences of feminist researchers and activists in South Asia the Middle East Africa and Latin America this unique volume

Transitions Out of Crime Catalina Droppelmann, 2021-12-30 This book contributes to our knowledge of desistance in a developing country Offering an intercultural dialogue with mainstream explanations Transitions Out of Crime analyses the transition from crime to conformity among a group of Chilean juvenile offenders Desistance from crime is not just the cessation of criminal activity itself but a process of acquiring roles identities and virtues of developing new social ties and of inhabiting new spaces This book offers new evidence that shows that the traditional binary between the reformed desister and the anti social persister is inaccurate and that the road to desistance contains various oscillations between crime and conformity Furthermore this study shows the role that gender plays in shaping limiting and structuring pathways away from crime Written in a clear and direct style this book will appeal to those engaged in criminology sociology penology desistance rehabilitation gender studies and all those interested in the transition from crime to conformity outside the Anglo American orthodoxy *Women and the Vote* Jad Adams, 2014-09-18 Before 1893 no woman anywhere in the world had the vote in a national election A hundred years later almost all countries had enfranchised women and it was a sign of backwardness not to have done so This is the story of how this momentous change came about The first genuinely global history of women and the vote it takes the story of women in politics from the earliest times to the present day revealing startling new connections across time and national boundaries from Europe and North America to Asia Africa Latin America and the Muslim world post 9 11 A story of individuals as well as of wider movements it includes the often dramatic life stories of women s suffrage pioneers from across the world painting vivid biographical portraits of everyone from Susan B Anthony and the Pankhursts to hitherto lesser known activists in China Latin America and Africa It is also the first major post feminist history of women s struggle for the vote Controversially Jad Adams rejects the widely accepted idea that success was primarily a result of the pressure group politics of the suffragists and their supporters Ultimately he argues it was nationalism not feminism that was the most important factor in winning women the vote *The City in Urban Poverty* C. Lemanski, C. Marx, 2015-05-12 The contributors respond to the absence of critical debate surrounding the ways in which spaces of the city do not merely contain but also constitute urban poverty The volume explores how the spaces of the city actively produce and reproduce urban
