Wooden Churches Of The Carpathians A Comparative Study:

Wooden Churches of the Carpathians Joby Patterson,2001 This seminal study focuses on wooden churches built by Romanian peasants examining the evolution of church building from 1000 1900 in the region known as Maramures a particularly powerful source of Romanian cultural tradition from an art history perspective **Last Judgment**

Iconography in the Carpathians John-Paul Himka,2018-10-11 Few subjects in Christianity have inspired artists as much as the last judgment Last Judgment Iconography in the Carpathians examines images of the last judgment from the fifteenth century to the present in the Carpathian mountain region of Ukraine Poland Slovakia and Romania as a way to consider history free from the traditional frameworks and narratives of nations Over ten years John Paul Himka studied last judgment images throughout the Carpathians and found a distinctive and transnational blending of Gothic Byzantine and Novgorodian art in the region Piecing together the story of how these images were produced and how they developed Himka traces their origins on linden boards and their evolution on canvas and church walls Tracing their origins with monks he follows these images increased popularity as they were commissioned by peasants and shepherds whose tastes so shocked bishops that they ordered the destruction of depictions of sexual themes and grotesque forms of torture A richly illustrated and detailed account of history through a style of art Last Judgment Iconography in the Carpathians will find a receptive audience with art historians religious scholars and slavists **Conservation of Architectural and Urban Heritage** Tarek Teba,Antonino Di

Raimo,2025-08-05 This book peers into the concept of conservation under the framework of sustainability The world s architectural history is in danger due to a lack of understanding expertise and care Some monuments have already been lost and more are under threat Heritage needs to be well understood interpreted defined and managed for future generations as it provides communities and cultures with retrospection and contributes to recorded history Additionally it discusses the relationship between cultural heritage preservation and sustainable development as well as restoration efforts for tangible and intangible cultural heritage assets The book aims to assist professionals working in the field of heritage conservation whether it is cultural rural architectural tangible or intangible It stands to be a valuable resource for architects and engineers as well as for conservators archaeologists environmentalists and policy makers **Heritage** Daniela

Turcanu-Carutiu,2022-09-07 This Edited Volume Heritage New Paradigm is a collection of reviewed and relevant research chapters offering a comprehensive overview of recent developments in the field of social sciences and humanities The book comprises single chapters authored by various researchers and edited by an expert active in the social sciences and humanities research area All chapters are complete in themselves but united under a common research study topic This publication aims at providing a thorough overview of the latest research efforts by international authors on social sciences and humanities and opens new possible research paths for further novel developments **Critical Computational**

Relations in Design, Architecture and the Built Environment Yana Boeva,Vernelle A. A. Noel,2024-12-16 This book

delves into the power relations between computational practices technology infrastructures knowledge and their reproductions of bias in design at multiple scales It provides critical perspectives and insights on how computation intersects with architecture design the built environment and society Computational practices tools and methods in design architecture and the built environment frequently offer technocentric solutions to design problems Portrayed as mere tools that are neutral and optimized these technological infrastructures mask social political and environmental entanglements involved in their creation and expansion as well as the power of software monopolies and technology providers The six contributions to this volume provide critical perspectives and insights on how computation intersects with architecture design the built environment and society The chapters cover diverse topics such as data practices for design simulations machine learning ML and digital humanities methods for digital heritage a computationally aided exploration of ideologies of digital architecture embodied and craft practice for digital fabrication feminist hacking practices challenging heteronormative values in digital urban design and post disciplinary pedagogies for computational design The book will be of interest to researchers students and practitioners in the fields of architecture built environment computational design science and technology studies and sociology The chapters in this book were originally published in *Digital Creativity* Casa Frumoasă Jan Harold Brunvand, 2003 Home to the New York Yankees the Bronx Zoo and the Grand Concourse the Bronx was at one time a haven for upwardly mobile second generation immigrants eager to leave the crowded tenements of Manhattan in pursuit of the American dream Once hailed as a wonder borough of beautiful homes parks and universities the Bronx became during the 1960s and 1970s a national symbol of urban deterioration Thriving neighborhoods that had long been home to generations of families dissolved under waves of arson crime and housing abandonment turning blocks of apartment buildings into gutted graffiti covered shells and empty trash filled lots In this revealing history of the Bronx Evelyn Gonzalez describes how the once infamous New York City borough underwent one of the most successful and inspiring community revivals in American history From its earliest beginnings as a loose cluster of commuter villages to its current status as a densely populated home for New York's growing and increasingly more diverse African American and Hispanic populations this book shows how the Bronx interacted with and was affected by the rest of New York City as it grew from a small colony on the tip of Manhattan into a sprawling metropolis This is the story of the clattering of elevated subways and the cacophony of crowded neighborhoods the heady optimism of industrial progress and the despair of economic recession and the vibrancy of ethnic cultures and the resilience of local grassroots coalitions crucial to the borough's rejuvenation In recounting the varied and extreme transformations this remarkable community has undergone Evelyn Gonzalez argues that it was not racial discrimination rampant crime postwar liberalism or big government that was to blame for the urban crisis that assailed the Bronx during the late 1960s Rather the decline was inextricably connected to the same kinds of social initiatives economic transactions political decisions and simple human choices that had once been central to the development and vitality of the

borough Although the history of the Bronx is unquestionably a success story crime poverty and substandard housing still afflict the community today Yet the process of building and rebuilding carries on and the revitalization of neighborhoods and a resurgence of economic growth continue to offer hope for the future *Buildings in Wood* Will Pryce,2005 From the very beginning of architecture long before the invention of masonry buildings were constructed of wood With its unique qualities of form color and structure wood is the most reliable building material at the core of architecture This epic history is the first comprehensive survey of the use of wood in architecture throughout the ages The book is organized both chronologically and geographically It surveys works from the oldest heritage of wooden buildings Kyoto s Buddhist temples and Scandinavia s pagan inspired stave churches to the latest cutting edge designs proving that wood is on the rise as the preferred material in these ecologically conscious times No region of the world with a native tradition of building with wood is left out In North America the book demonstrates the European origins of New England s clapboards and saltboxes and later shows how such sophisticated California architects as Greene Greene or Bernard Maybeck could blend age old traditions of the Far East and Switzerland with a Pacific Coast sense of novelty and whimsy Spectacular and diverse photographs highlight the architectural masterpieces of wooden architecture throughout the world illustrating that wood is a building material with a deep history as well as a vibrant future *The Best We Share* Christoph Brumann,2021-03-03 The UNESCO World Heritage Convention is one of the most widely ratified international treaties and a place on the World Heritage List is a widely coveted mark of distinction Building on ethnographic fieldwork at Committee sessions interviews and documentary study the book links the change in operations of the World Heritage Committee with structural nation centeredness vulnerable procedures for evaluation monitoring and decision making and loose heritage conceptions that have been inconsistently applied As the most ambitious study of the World Heritage arena so far this volume dissects the inner workings of a prominent global body demonstrating the power of ethnography in the highly formalised and diplomatic context of a multilateral organisation
